i-plant™ Impression Trays

ids (integrated dental systems) introduces i-plant™ Impression Trays that are ideal for use in both open and closed tray impression techniques and are great for crown and bridge applications. Each tray has convenient cut-outs that can be removed with cotton pliers for open tray impressions. i-plant trays can be used with extreme angulations, are compatible with facially angled impression copings and allow easy frontal perforation. The tray is made from clear plastic for easy placement and the ergonomic handle provides increased support and leverage. The trays are available in small, medium and large (upper and lower) Anterior, Left & Right Quadrant in packages of 12. The i-plant Impression Tray is the only tray you'll ever need.

ids was formed to provide a full suite of innovative tooth replacement products that will help achieve better outcomes for dentists and patients alike. Our products feature designs and technologies that provide shorter and more precise procedures, less recovery time, and enhance the relationships between dentists and their patients — all at more cost-effective price points. Our commitment to developing more solutions that help dentists provide more profitable and better results is the focus of everything we do. Innovation that delivers more for you and your patients.
