

HPE Certified Pre-owned Services for HPE Nimble Storage Gen5

HPE Financial Services can help customers find new ways to plan for, acquire, consume and sustainably retire the technology needed for digital transformation.

Driving innovation and reliability within your IT infrastructure doesn't always mean relying on new technology. Companies utilizing HPE Certified Pre-owned Services benefit from reduced IT costs, reduced e-waste, maximized ROI and performance.

The HPE CPO Services technology portfolio continues to expand with the availability and support of HPE Nimble Storage Gen5. HPE CPO Services can help you:

- Ease end-of-life migrations
- Quickly build capacity for growing data demands
- Bridge multi-gen IT infrastructures to accelerate your migration to HPE GreenLake
- Overcome budget constraints while ensuring performance
- Support short-term projects or anticipated periods of increased capacity

- HPE Pointnext Tech Care support
- HPE InfoSight predictive alerts¹
- Available in North America and EMEA

Supported models

- HPE Nimble Storage All-Flash Arrays: AF20Q, AF20, AF40, AF60, AF80, Scale-out 4X AF80
- HPE Nimble Storage Adaptive Flash Arrays: HF20, HF20H, HF20C, HF40, HF40C, HF60, HF60C, Scale-out 34X HF60

Program details

- 30-day return to factory warranty
- Upgrade/downgrade firmware per your requirements

¹ Access to HPE InfoSight requires a valid support contract and an active HPE InfoSight account. If customers do not have a current, active account they will need to register for one.

The certification process for HPE Nimble Storage

- 1. Tested and authenticated.** Each HPE Nimble Storage array is tested and validated down to the component level to ensure authenticity.
- 2. Updated to latest revisions.** Firmware and security patch updates are performed so that you can deploy faster.
- 3. Fully supported.** HPE Pointnext Tech Care support added for all available models.

4. Software licenses included.

The HPE NimbleOS and HPE InfoSight are included as part of the support contract activation.

- 5. Built-to-order.** Supported array models can be configured to match existing environment.
