

First Responders Trust Cradlepoint

Public Safety Organizations Across the U.S. Leverage Cradlepoint Solutions to Remain Connected to LTE Wireless Networks

Whether in the field or in the station, first responders need to remain connected at all times. Cradlepoint's cloud-managed 4G LTE network solutions are used by first responder and secondary responder agencies in every U.S. state. These solutions provide mission-critical data networks for vehicles, mobile command centers, surveillance cameras, incident response teams, body-worn devices, and more.

2,000+
agencies

use Cradlepoint solutions to help keep communities safe.

70%

of police departments in the **10 most populated U.S. cities** use Cradlepoint solutions.

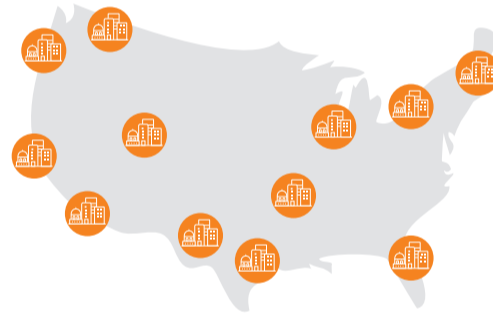

Using Cradlepoint's routers, which are carrier agnostic, made it so easy to switch from our previous carrier and turn our mobile command center into a FirstNet point of access, handling day-to-day operations, emergencies, large-scale events, and everything in between. Should a disaster occur, I know we have the right solutions managing our communications networks."

— Jackie Crofts, deputy director of technology, Department of Emergency Communications, City of Richmond

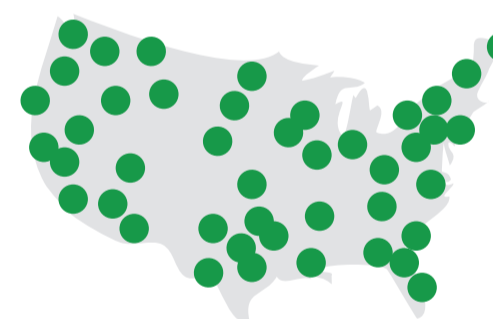

4 OF 5

fire departments in the most populated U.S. cities use Cradlepoint solutions.

100% of the 10 most populated cities use Cradlepoint solutions.
