PARTNER® ACS

PARTNER Advanced Communications System Release 7.0 provides enhanced functionality and new, leading-edge communications technology to help businesses improve customer service and advance their business goals. This release features new fractional T1 functionality that enables businesses to make use of more efficient and cost effective trunking options. And with Cell Phone Connect via a T1 line, businesses can improve customer responsiveness - a key priority in today's competitive market. This new feature enables callers to easily access their business contact (even if that contact is out of the office) by simultaneously outcalling to the contact's cell phone.
