

Right-Handed Layout (at right)

The return or bridge is on the user's right hand side as he/she sits at the desk. The desk must have the single pedestal storage on the left and the return or bridge units must have storage on the right.

Left-Handed Layout (at right)

The return or bridge is on the user's left hand side as he/she sits at the desk. The desk must have the single pedestal storage on the right and the return or bridge units must have storage on the left.
