

DATASHEET

BENEFITS OF CENTRALIZED FAXING, PRINTING, SCANNING AND COPYING

Companies gain significant benefits by adding RightFax network faxing capabilities to their Konica Minolta MFPs.

Cost control Consolidates resources and eliminates the need for multiple stand-alone fax machines, modems, phone lines and supplies by centralizing RightFax services at Konica Minolta MFPs

Increased productivity and business efficiency Allows users to print, scan, copy and fax on one consolidated Konica Minolta MFP right at the user interface (UI)

Enhanced security and compliance Offers tamper-resistant document delivery as well as certified or encrypted email delivery options

Optimized IT infrastructure investments Optimizes through integrations with Konica Minolta MFPs as well as email, document management, workflow and other applications to make a more efficient, connected work environment

Simplified deployment and management Centralizes document development, duplication and delivery functions on an integrated networked solution using the RightFax MFP Module and Konica Minolta MFPs

Captaris® RightFax® Integrations with Konica Minolta

Reduce Costs and Improve Productivity by Integrating RightFax Network Fax Capabilities with Konica Minolta bizhub MFPs

OVERVIEW

RightFax integrates with Konica Minolta bizhub MFPs to consolidate all faxing services on the network, giving users convenient access to faxing capabilities on the same devices used daily for printing, scanning and copying, plus giving the company better control over document flow and security. With RightFax, users gain both easy walk-up access and a central point of control for electronic or hard-copy faxing. As a result, organizations can streamline document flow processes and improve security while reducing the time and cost of administrative tasks.

Integrated with Konica Minolta bizhub MFPs and available exclusively through Konica Minolta or an authorized dealer, the RightFax MFP Module is the ideal solution for organizations that want a cost-effective, consolidated solution to electronically capture, process, deliver and track fax documents. RightFax is available from Captaris and Captaris resellers.

FEATURES

RightFax provides robust, reliable and integrated fax server and electronic document delivery features, including:

PRODUCT FEATURES	
Centralized management and administration tools	Provides intuitive configuration wizard and management tools to ease deployment and ongoing management
Intelligent outbound fax delivery from Konica Minolta MFPs	Sends documents directly from Konica Minolta MFPs or from desktop and other business applications; Delivery options include scheduling and priority sending
Flexible document delivery options at the Konica Minolta UI	Delivers scanned documents via walk-up user, RightFax user, certified email and encrypted PDF; Certified email and encrypted PDF delivery require the RightFax Enterprise Suite.
Advanced sending features	Gives access to RightFax user accounts, cover sheets and scheduled delivery options directly from the Konica Minolta MFP
RightFax reporting, tracking and notifications available	Logs all data and actions for a faxed document and provides Konica Minolta users customizable notification options for audit trail and accountability
Annotated with billing codes	Allows faxes to be annotated with billing codes for accounting purposes
First-page thumbnails on notifications to Konica Minolta MFPs	Provides first-page thumbnail of outbound faxes for tracking and identification printed with the notification back to the device
Scalable platform	Allows organizations to easily expand MFP integrations, manage current MFPs allowing switching as needed, add MFP modules and more

Captaris RightFax Integrations with Konica Minolta

OUTBOUND FAXING

Konica Minolta bizhub MFPs can capture paper documents and route them electronically to the RightFax Server with the RightFax MFP Module Konica Minolta Connector. Users initiate the outgoing fax by using the touchscreen UI. There are four standard options one can initially choose from at the UI:

- Walk-up User
- RightFax User Account
- Certified Delivery
- Encrypted Delivery

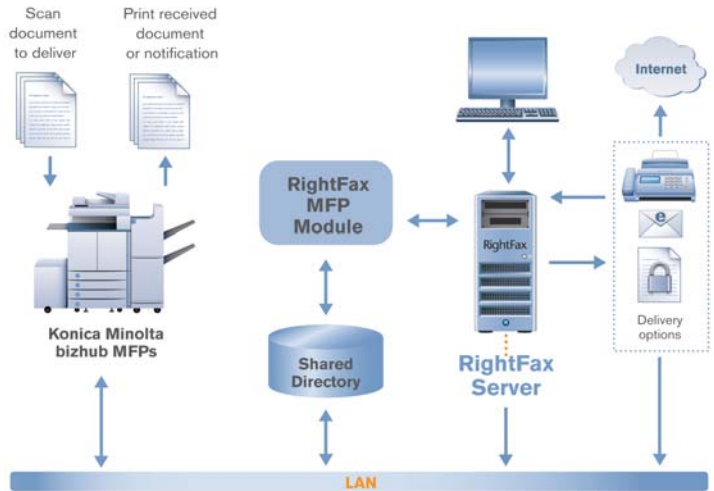

Once the fax instructions are captured, the document is scanned. The document is converted into a Tagged Image File (TIF) and routed to the RightFax Server with the attached fax instructions. RightFax then converts the TIF to Comité Consultatif Internationale de Télégraphique et Téléphonique (CCITT) Group IV and transmits the document.

INBOUND FAXING

Incoming faxes arrive at the RightFax Server where they can be routed to the Konica Minolta bizhub MFP on the network. Faxes are received in the normal print queue and can then be printed or routed electronically for distribution and retrieval.

HOW IT WORKS

RightFax MFP Module Information Flow

Note: Printing a received fax at the MFP does not require the RightFax MFP Module, only a RightFax Server. Printing a notification does require the RightFax MFP Module with your RightFax Server.

REQUIREMENTS FOR INTEGRATION

RightFax MFP Module	One RightFax MFP Module with the Konica Minolta Connector is required per RightFax Server, with a license required for each Konica Minolta MFP device on the network. RightFax MFP Module with Konica Minolta Connector licenses can be purchased exclusively through Konica Minolta direct or through authorized dealers.
Konica Minolta	An MFP firmware update and utility software are required. Both are available from Konica Minolta or authorized dealers.
Supported Konica Minolta MFPs	http://www.Captaris.com/partners/strategic_alliances/konica_minolta/Integrations_for_KM.html
RightFax Server Options	RightFax Business or Enterprise Server 9.3 or later; both available from Captaris resellers For access to RightFax encrypted and certified delivery options, the RightFax Enterprise Suite is required.
