CLEANLETS™ ULTRASONIC CLEANING TABLETS

Super Convenient, Highly Effective Cleaning at a Great Value!

ENGLEWOOD, NEW JERSEY, (June 2008) – Sultan Healthcare announces CLEANLETS™ Ultrasonic Cleaning Tablets. Available directly through Sultan's global network of distribution partners, CLEANLETS General Purpose Ultrasonic Cleaning Tablets offer convenience, superior performance and excellent value for the decontamination of instruments.

Developed with patented technology, CLEANLETS Ultrasonic Cleaning Tablets pack greater cleaning power into each tablet creating highly effective solutions. CLEANLETS are a lightweight alternative to handling and shipping heavy, liquid containers. Their effervescent action makes mixing quick and easy with no residue left in the tank or on instruments. And its unique blister package makes dispensing a snap!

In an independent study, CLEANLETS General Purpose was proven to clean better than leading branded tablet cleaners. In addition, CLEANLETS General Purpose provides excellent cleaning properties that last all day, unlike enzyme cleaners that lose effectiveness throughout the day.

CLEANLETS General Purpose Solution requires only one tablet per gallon (3.8L) vs. two required by leading competitive tablets, creating a better value on a cost per use basis. In addition CLEANLETS provide major savings on shipping costs

versus liquid cleaners because they are so lightweight. Above all, the small compact packaging allows the user to gain back valuable office storage space.

“CLEANLETS has a unique blister pack design making it easy for the customer to dispense and store the product. What office couldn't use more space in their storage closet?” asks Tim Lorencovitz, Product Manager of Sultan Healthcare. “Combine the convenience with superior cleaning and no residue, and we have a truly unique innovation in ultrasonic cleaning solutions.”

CLEANLETS are packed 32 tablets per box. The General Purpose solution is effective for cleaning common soils on all types of dental and medical instruments in an ultrasonic machine. One General purpose tablet makes one gallon (3.8L) while leading solutions require two tablets per gallon.

Sultan Healthcare, established in 1872, is a leading manufacturer of infection control, dental materials, preventive products and oral therapeutics. Sultan distributes products through dental dealers on every continent and maintains its global reach with an extensive network of highly trained field representatives.
