

ExpressPod

A CISCO AND NETAPP
INFRASTRUCTURE SOLUTION
FOR SMALL AND MEDIUM-SIZED BUSINESSES

THE CURE FOR SERVER SPRAWL

Small and medium-sized businesses everywhere are reporting symptoms of “server sprawl.” This epidemic is characterized by an overabundance of underutilized servers and storage systems, often caused by running one application per server to protect against potential machine crashes. ExpressPod™ with VMware® is the cure—saving you money, energy, time, and ... did we say money?

symptom

Wasting money on too many servers

Fact: Many servers and storage systems are utilized less than **20%**.

cure

ExpressPod consolidates multiple physical servers and storage systems onto a single, powerful, shared platform.

Result: Cut your server and storage-related costs by 50% when you consolidate your resources through virtualization.

*ACCORDING TO DATAMATION

symptom

Wasting money and energy powering unused server and storage capacity

Fact: Energy costs for physical servers and storage systems are up to **40%** higher than virtualized solutions.

cure

ExpressPod reduces the energy required to power and cool physical server and storage systems.

Result: Recoup your initial investment in two years or less—based on energy savings alone.

*ACCORDING TO ENERGYSTAR

symptom

Wasting time and money maintaining servers and storage

Fact: Physical servers and storage systems can take **3x** longer to deploy than virtual solutions

cure

ExpressPod enables overworked IT staff to spend less time maintaining servers and storage systems, and more time on strategic projects.

Result: Convert hours spent on manual maintenance into time spent purely on business growth.

*ACCORDING TO ENTERPRISE FEATURES

CURE “THE SPRAWL”

Visit www.cisco.com/go/expresspod to discover how ExpressPod with VMware can cure your costly server sprawl issues by consolidating multiple servers and storage systems onto powerful Cisco UCS™ Servers and switches, NetApp® FAS storage, and VMware virtualization software.
