Calibre® Lateral Files

Well-built. Rugged. Organize your workplace with efficiency and style.

The 1.5" planning advantage

A 55.5"-tall, 5-high lateral file (far right), created with 5-10.5" drawers, increases usable space for hanging files with top tabs by 20 percent, with easier accessibility than a typical 63"-tall, 5-high lateral using 5-12" modules (near right). *How?* When 12" drawers are used in 5-high lateral files, the top is often a receding door because a hanging file drawer would be difficult to access at this height. The 1.5" planning solution offers a more effective use of your space for hanging file storage. Your filing at work for you.

See pages 47-48 for Knoll Essentials Calibre Lateral File finishes. For the complete line of Knoll Essentials Calibre Lateral Files, consult the Knoll Essentials price list.
