# Savin ScanRouter DocumentServer

## Access Information On Your Network From Anywhere, Any Time, With The Confidence Of Security, Reliability And Efficiency.

### ScanRouter DocumentServer

Today businesses are required to process and distribute increasing amounts of information. They need to accomplish this in a more rapid and cost-effective way.

Savin's **ScanRouter DocumentServer** provides seamless and immediate document access, delivery and security. It enables shared information capabilities across your entire organization.

The ScanRouter DocumentServer is designed for small to mid-size workgroups. Now with this system, you can share data securely with those who need access.

This shared data can be accessed and manipulated using Savin's powerful **DeskTopBinder V2 Pro** client software or a standard web browser.

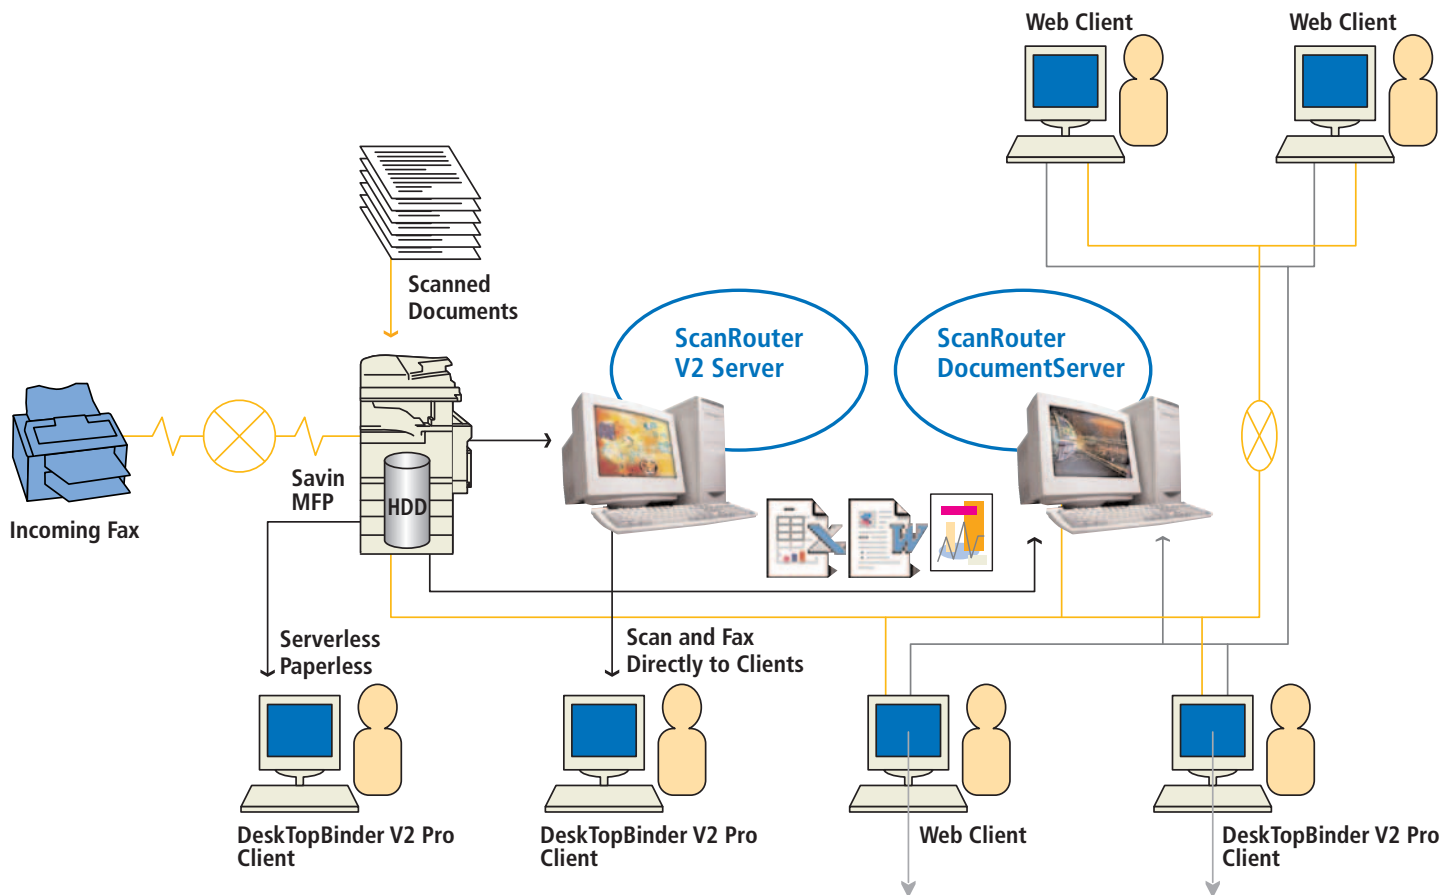

Whether you are in an office, hotel room or airport across the world, you can easily retrieve, modify and disseminate vital information securely with VPN (Virtual Private Network) access using DeskTopBinder Pro or a standard web browser.

All of this can be handled from your company's network via your desktop or laptop.

### ScanRouter DocumentServer Administration Utility

Manage your ScanRouter DocumentServer remotely using ScanRouter DocumentServer Admin Utility.

- Set up 20 cabinets with password protection.
- Customize document type for advanced search functionality.
- Automated backup for system integrity.

# With DeskTopBinder Professional

## Designed For Easy Integration With Digital Copiers And Network Scanners, Your Document Retrieval Is Optimized At Your DeskTop.

### DeskTopBinder V2 Pro Client

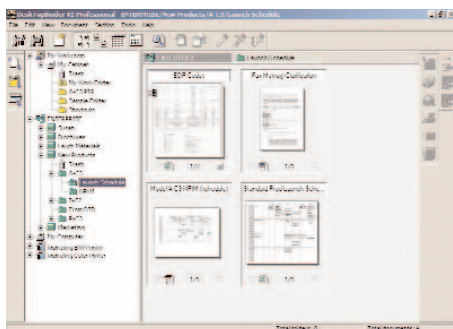

- Access vast amounts of data without needing to load them on the DeskTop HDD through a seamless link to ScanRouter or the DocumentServer.
- Input documents directly from Scanners, Windows Files, or Windows Explorer.
- Identify documents easily through icon and thumbnail representation of actual documents and content, as well as traditional file and folder structure for advanced indexing.
- Direct Search by document name, size, date, author or by keywords that you customize as part of your indexing process.

- Content Search will search the entire document – all text on a page that was run through the included Optical Character Recognition program (OCR). Find documents by searching specific words or phrases that it contained.
- Drag and Drop documents between the Desk Top and the ScanRouter DocumentServer or within the application.
- Paste color-coded notes onto files to highlight key information for future reference and/or retrieval.
- Add text or preset stamps to images and save the edits.
- Export files to specific applications without file format conversion.
- E-mail directly from the DeskTopBinder window with file attached.

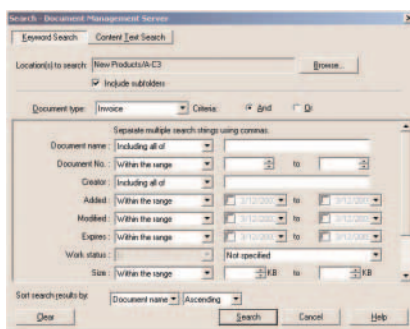

### Web Browser Client

- Access the cabinets on the ScanRouter DocumentServer from client PCs.
- Documents stored in ScanRouter DocumentServer cabinets can be viewed by various types (thumbnail, list, detail) for retrieval and editing.
- Register documents directly to ScanRouter DocumentServer.
- **Direct Search** by document name, size, date, author or by customized keywords for indexing purposes.
- **Content Search** allows users to send all converted (OCR) documents containing specific word(s) in the ScanRouter DocumentServer.
