Flammability Ratings for Steelcase Panel Systems

GSA requires all panel systems under SIN 711-1 to fall within 200 or less in flamespread and 450 or less in smoke developed in an ASTM E-84 test method. ASTM E-84, NFPA 255, UL 723, and UBC 42-1 all specify identical test methods. Various Building Codes and UL specify acceptance criteria based on flamespread index (FSI) and smoke development (SD). Rating classifications are as follows:

FSI	SD	Rating Classification
25 or less	450 or less	Class 1
26–75	450 or less	Class 2
76–200	450 or less	Class 3

The classifications for Steelcase panel systems products (SIN 711.1) are as follows (all testing on tackable acoustical panel constructions):

System	Rating Classification
Answer	Class 1
Avenir	Class 1
Series 9000 (Conventional or “C”)	Class 1
Series 9000 (Enhanced or “E”)	Class 2
Kick	Class 1
Montage	Class 1
Pathways:	
Segment	Class 1
Technology Wall	Class 1

All fabrics listed as available were tested according to GSA General Specification for Furniture Systems – FCNE 87-441C, currently being revised (either the ASTM E-84 method or NFPA 701).

Canopy lights are task lights that provide broad coverage and evenly balanced light that significantly minimizes glare. They offer a variety of mounting options independent of overhead storage. Canopy lights are designed to complement a variety of Steelcase systems furniture and many competitive furniture lines.

Depth	7 1/16"
Width	24" 36" 48"

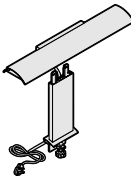

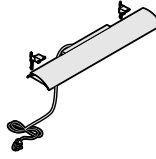

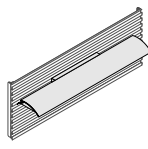

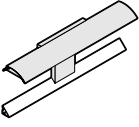

Optics
Patented, crescent-shaped lens with specular aluminum reflector.

Scientifically designed reflector and crescent-shaped optics lens for low glare and broad distribution of light.

Architectural Drywall	No	Yes 4	No	No

- 1 Use rail-mounting riser. Ordered separately.
- 2 Competitive products that can accommodate canopy lights by using the standard Answer, Avenir, and Series 9000 panel-mounting bracket include:
 - All Steel 8000
 - American Seating Framework
 - Haworth Unigroup, Places
 - HON
 - Kimball Cetra
 - Knoll Morrison, Equity, Rugby
 - K1 System 3000
 - La-Z-Boy Contract
 - Panel Concepts
 - Precision
 - SMED
 - Teknion
 - Trendway
 - Unicore
 - Xception
- 3 Additional brackets can accommodate panel-mounted canopy lights on:
 - Haworth Premise
 - Herman Miller Action Office, Ethospace
 - Knoll System 6, System Z
- 4 Use optional architectural drywall brackets.
- 5 Use Details WorkFlo rail. Ordered separately.
- 6 Use Details slatwall. Ordered separately.

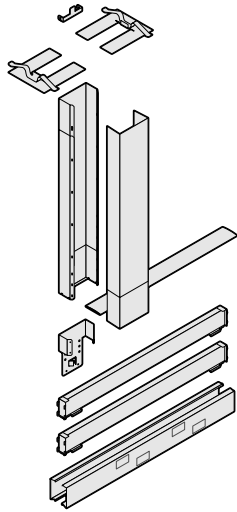

Answer Statement of Line, continued

Shelf lights mount into the recessed bottom of storage shelves and bins to illuminate the worksurface. Three types of shelf lights are available to control the quality of light for specific applications. Each type is compatible with Steelcase systems furniture and all major competitive furniture lines.

Width	25", 37", or 49"	25", 37", or 49"	19", 25", 37", or 49"
Description	Provides maximum glare control, which makes it the best light for people who perform repetitive functions, do critical visual tasks, or have eyes that are particularly sensitive to light. Minimizing reflected glare is critical for these workers.	The right choice for the majority of people in today's workplace who switch frequently from task to task throughout the day.	Designed for use in display areas, service centers, under transaction tops, and other applications where glare control is not a primary consideration.

Answer

Bracket Application Rules

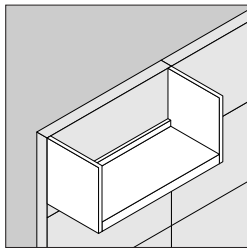

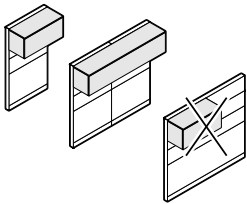

for Universal Overhead Bin and Universal Full-Height Shelf
SIN 711.1

Bracket Application Matrix

	On-module	Off-module
Answer	•	
Kick	•	
Montage	•	
Enhanced Off-Module Montage	•	•
Pathways Technology Wall	•	•

On-Module Brackets

On-module brackets are used to mount bins and shelves to panels with vertical slot patterns.

On-module attachment brackets install in panel seams.

Width of overhead storage unit must match the width of the panel or panels that it is attached to.

Additional support for stability may be required when shelves and overhead storage bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

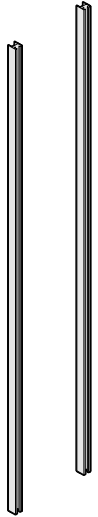

Tip: See Panel Stability Guidelines.

▶ See Answer Solutions Specification Guide.

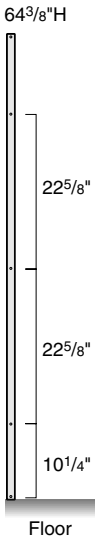

Accessories

Wall Hung Channels and Horizontal Braces SIN 711.1

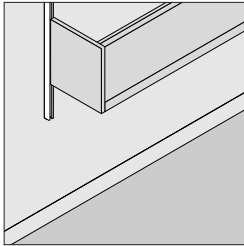

Slotted steel channel can attach to wall of building to accept shelves or overhead storage bins.
▶ Specifying, page B162

Screw hole positions

Product Details

Wall channel can be positioned on wall at height needed.

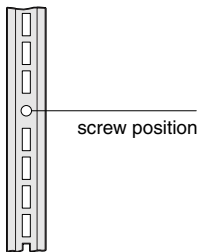

Connections

Wall channels can be used to support shelves, overhead storage bins, or tackboards. Wall channels can be shared.

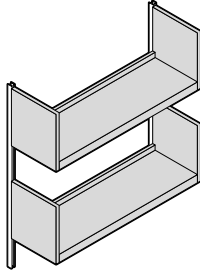

Field install:

- Concrete walls with Hilti® type anchors.
- Drywall or plywood with 5/8" thick Toggler® R-type 3/16" wall anchors with countersunk flat head screw.
- Steel or wood studs with #10 sheet metal or wood screws of appropriate length with countersunk flat head screw.

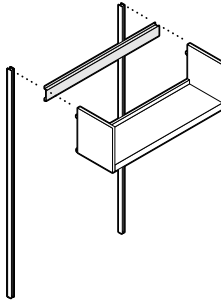

Anchors must be used in each screw hole location on the wall channel.

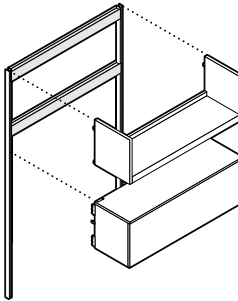

Components attach at 1" increments, but screws block some slot locations.

Limit load to two panel-supported components (maximum 150 pounds per component) for each pair of wall channels.

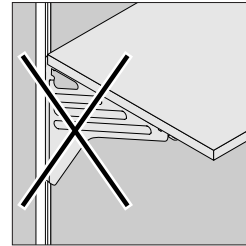

Horizontal brace is available to reinforce vertical wall channels that support storage bins and shelves that are attached to walls. Components that are 36"W or less do not require a horizontal brace.

Up to two components can be supported with one horizontal brace. The brace should be positioned at the top of the vertical wall channels. If more than two components must be supported, an additional brace can be added at the appropriate height.

Width of horizontal brace must match width of shelf or storage bin. Brace is not required for applications that involve shelves and bins that are 36"W or less.

Wall hang channels for shelves, overhead storage bins, or tackboards cannot be used with a wall start junction.

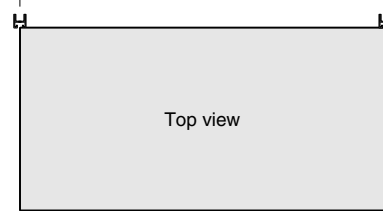

Attaching worksurfaces to wall channels is not possible.

Application Topics

Reinforce wall by positioning studs where wall channels will be attached. See dimensions below.

Distance between center lines of reinforced wall channels matches width of overhead storage unit.

Tip: Wall channels can be shared.

Basic Brackets

Basic brackets are used to mount bins and shelves to panels with vertical slot patterns. Basic attachment brackets push bins and shelves 1/4" from frame.

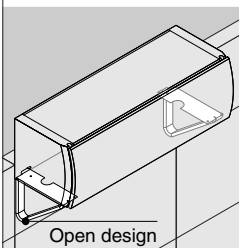

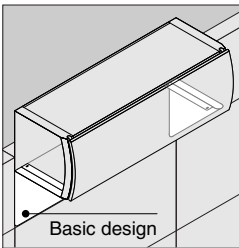

Width of overhead bin or shelf must match or be wider than the width of the panel or panels that it is attached to.

Basic attachment brackets install in panel seams and allow bins and shelves that are wider to be attached. Total width of bin or shelf can extend 12" beyond the bracket on one side.

Upmount Brackets

Upmounted bin and shelf height is 66"H when installed on 54"H panels.

Upmount bin or shelf width must match the width of the panel or panels that it attaches to. Upmounted bins and shelves cannot be supported off-module.

Basic and open design upmount brackets, optional, attach bins and shelves near the top of 54"H panels.

Tip: Stationary shelf cannot hang from an upmounted bin or shelf.

Tip: Display shelf will be center-justified on upmounted bin or shelf.

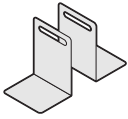

Tip: Display shelf will not attach to an upmounted 30"W bin or shelf.

Standard Shelf Lights

SIN 711.1

Tip: Daisy chaining is not allowed in New York City or Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Because shelf lights are usually recessed, black is the standard paint color. Paint colors other than black have an upcharge.

Tip: If an optional paint color is selected for the housing, the electrical switches and end caps will remain black plastic.

Standard Includes	Required to Specify
-------------------	---------------------

- Light housing with centered on-off switch: black paint
- End cap cord managers: black plastic only
- Cords:
 - 9' cord with three-prong plug at 45° angle: black vinyl only
 - One 30" and one 48" cord with modular connectors for daisy chaining: black vinyl only
- Contrast sleeve around lamp
- Faceted reflector: white only
- T8 3500K lamp
- Ballast
- Universal mounting hardware package
- Daisy chain starter cord, if selected: black vinyl only (order separately)

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

All fabrics may not be available on junction trim. 78"H trim can accept only Belgrade fabric.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders and the Surface Materials Tool Box.

Surface Materials

Binders include:

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Surface Materials

Tool Box (S8150) provides 3" x 3" samples of the following surface materials:

- Vertical surface fabrics
- Seating upholstery
- Wood veneer
- Paint
- Laminate

Paint

Applies to:

- Panel components
- Worksurfaces
- Storage components
- Lighting

- 2854 Vellum Fiber
- 2857 Stream Fiber
- 2859 Novell Fiber
- 2860 Granite Fiber
- 2870 Blonde Bronze Patina
- 2871 Blackened Bronze Patina
- 2872 Silver Plate Patina
- 2873 Instant Iron Patina

Accent Laminate

Accent laminates are available with an upcharge of \$60 U.S. per worksurface. Please see the *Accent Laminate* swatch card within the *Steelcase Hard Finishes Binder* for a complete listing of these colorful laminates.

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Open Line Laminate

This service allows you to order non-standard laminate at an additional processing fee of \$60 per worksurface, plus the cost of the laminate.

Edge color for the Open Line laminate must be determined by the dealer and customer before orders can be entered.

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Steelcase carefully selects veneer and solid wood or consistent color and grain structure. Wood is a natural material and variations will occur in color, grain, and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be arranged periodically to ensure even aging of wood surfaces.

Veneers are flat cut and are matched for proper balance and consistency.

Open-pore finish is a medium-gloss finish that leaves the wood texture visible to the eye and distinguishable to the touch.

Open-pore finish choices

- 3412 Natural Cherry
- 3422 Medium Cherry
- 3562 Linseed on Maple
- 3572 Amber Maple on Maple
- 3582 Winter on Maple
- 3592 Blonde on Maple
- 3632 Medium Oak
- 3642 Natural Oak
- 3712 Natural Walnut
- 3722 Dark Mahogany on Walnut
- 3742 Autumn Walnut
- 3772 Medium Mahogany on Walnut
- 3792 Black Walnut

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look and it is smooth to the touch. This finish is available on the wood worksurface or top only.

Full-fill finish choices

- 3414 Natural Cherry
- 3424 Medium Cherry
- 3534 Winter on Maple
- 3544 Blonde on Maple
- 3564 Linseed on Maple
- 3574 Amber on Maple
- 3634 Medium Oak
- 3644 Natural Oak
- 3714 Natural Walnut
- 3724 Dark Mahogany on Walnut
- 3744 Autumn Walnut
- 3774 Medium Mahogany on Walnut
- 3794 Black Walnut

Customiz stain

Customiz stain is a service that allows you to create your own stain colors on standard veneers. Customiz stain color is available on all product lines that offer wood veneer.

A one-time formulation fee of \$400 per color, per customer processing fee will apply. The fee covers the cost of formulating the Customiz finish and applies regardless of whether or not an order for product is placed. Please refer to the "Customiz Stain" option price column in your specification guide for the unit upcharge.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by specials engineering. Customiz stain on custom veneers take two to four weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Directional Laminate Grain Directions

Directional laminates
are standard with the grain
directions shown.

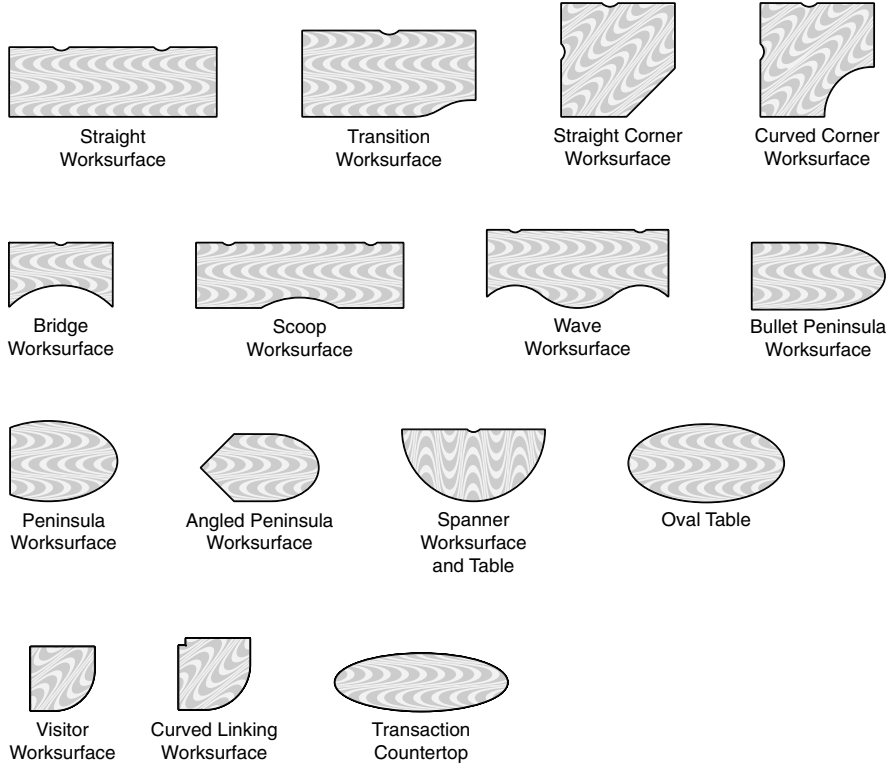

Make a sketch of the
grain direction on adjacent
worksurfaces to be sure
they are suitable for your
installation.

Examples:

Wood Grain Directions

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

Answer

Lock and Keying

B186

Lock and Keying

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

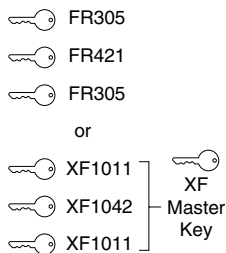

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture

units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.

▶ See below.

Key Random

Required to Specify

Master key random	+\$20	Specify with master key random.
--------------------------	-------	---------------------------------

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.

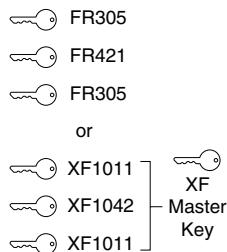

▶ See example at right.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

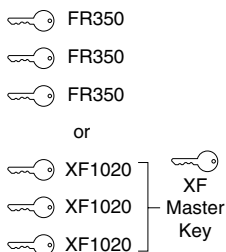

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR FR320
5	LOCK9201FR FR350
15	LOCK9201XF XF1100
30	Total
1	877102003SR standard lock tool
1	877102002SR master lock tool

Montage

Statement of Line

Canopy lights are task lights that provide broad coverage and evenly balanced light that significantly minimizes glare. They offer a variety of mounting options independent of overhead storage. Canopy lights are designed to complement a variety of Steelcase furniture and many competitive furniture lines.

Depth 7 1/16"

Width 24"
36"
48"

Optics

Patented, crescent-shaped lens with specular aluminum reflector.

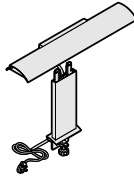

Scientifically designed reflector and crescent-shaped optics lens for low glare and broad distribution of light.

Description	Provides maximum glare control, which makes it the best light for people who perform repetitive functions, do critical visual tasks, or have eyes that are particularly sensitive to light. Minimizing reflected glare is critical for these workers.	The right choice for the majority of people in today's workplace who switch frequently from task to task throughout the day.	Designed for use in display areas, service centers, under transaction tops, and other applications where glare control is not a primary consideration.

Specifying Tips

General Tips

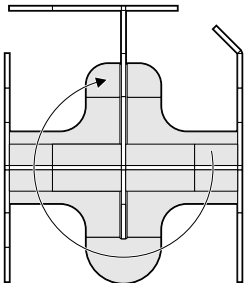

Standard Includes

- Case: paint
- Waterfall or rod pulls
- Dividers in box drawers
- Hanging file folder rail in file
- Lock in top drawer, key ran
- Polished Chrome
- Leveling glide
- Left- and right-hand filler ar

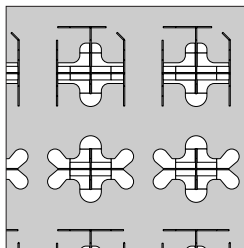

Review the features that are standard for each product before you begin to specify. You only need to include specifications for options, surface materials, and colors when you want a substitute for the standard.

To ensure that you do not overlook anything, approach the specifying process in a consistent order every time. Here are three common methods:

Specify products according to their order on the specifying pages.

Specify all workstations using a formulated pattern, such as starting at the entrance to a workstation and moving clockwise.

Specify each type of workstation in your installation and then determine how many of each type are needed.

Frames

Specify style numbers for all base frames and stack-on frames.

Specify enhanced standard frames, enhanced off-module frames, or a mix of both types of enhanced frames.

Specify enhanced stackers for use on enhanced frames.

Specify standard stackers for use on standard frames.

Choose frames with desk-height cavities factory installed for positions where you want to install desk-height powerways.

Keep track of which frames you want to accommodate power, and you'll have an easy way to cross-check with your specifications for powerkits and base covers. 45"H and 65"H frames accommodate powerways in their bases or at desk-height. 20"H frames accommodate cable routing but no other power distribution components.

Plan for 65"H or 86"H frames instead of a 45"H or 65"H frame with a 20"H frame stacked on top when the flexibility of variable heights is not needed. A single 65"H or 86"H frame will cost less than a 45"H or 65"H and a 20"H.

Add base covers and desk-height cavity covers to your list of specifications at the same time you specify frames so they are not overlooked.

Specify junctions by listing their style numbers and surface material.

No junctions are needed for frames that connect in a straight line at the same height or at different heights in off-module connections. But remember to specify end trim to finish the exposed portion of the taller frame.

Junctions are available to join frames in L, T, Y, X, V, and I configurations.

Specify junctions for use with lay-in cable tracks when specifying lay-in cable tracks.

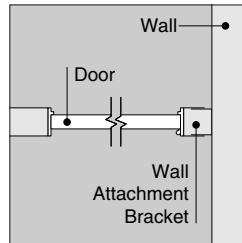

Specify a wall-attachment bracket if you want a way to adjust space when installing a wall between two fixed points or when you suspect that the wall you want to connect frames to is not plumb. Remember that the 86"H wall-attachment bracket has no top cap.

Specify enhanced frames for new customers and existing customers with new sites.

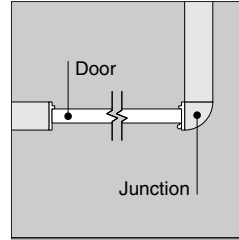

Specify end-of-frame or mid-frame off-module brackets when doing off-module frame connections.

Doors

Remember that door frames are not structural. Use a stack-on frame above a door frame to provide stability. For applications where no frame is going to be installed above the door, a special top cap linked to adjacent frames is required. Contact your Steelcase area office to discuss your application.

Specify a wall-attachment bracket to attach one side of a door frame to a building wall.

Use a junction on one side of a door frame to allow adjacent frames to be perpendicular to the door.

Determine if you need a left-hand or right-hand door by picturing yourself standing in the door frame with your back against the side of the frame with the hinges. If the door swings to your left, it's a left-hand door. If the door swings to your right, it's a right-hand door.

Wiring & Cabling

Specify a powerkit to correspond to the width of each frame with power. The frame-to-frame power connector cable that links adjacent powerkits together is included, so you don't need to order it.

Keep track of which surfaces will have desk-height cavity covers so that you can order smaller 13"H tiles for these frames.

Choose a base power-in to carry power from the floor of the building to the base of a frame. To extend power up to desk-height powerkits, you'll need to specify a base-to-desk-height power transfer cable. Remember that a power transfer cable must be routed through a junction.

Choose a top power-in to carry power from the ceiling down to either a powerkit at desk height or a powerkit in the frame base. Remember that a top power-in requires a power and cable pole of the appropriate size and that the power and cable pole must be positioned over a square L, T, or X junction to allow the top power-in cable to be routed.

Order covers. Plain base covers can be used in the bases of frames without powerkits or on the side of a frame where you don't want access to the powerkit's receptacle locations. Specify power base covers where you intend to have receptacles. Specify desk-height cavity covers for both sides of all the frames where you will have desk-height powerkits and want voice/data terminations and access to voice/data receptacles. Specify enhanced desk-height cavity covers for all frames manufactured after June 11, 2001.

Specify lay-in cable tracks, lay-in junction kits, lay-in change-of-height tracks, and end trims for use with lay-in tracks when lay-in cable management is desired.

Specify optional data openings below worksurface when extra voice/data plug-ins are needed.

Specify optional cable tray below the worksurface on a desk-height cavity cover when additional cord management is needed.

Specify power receptacles, voice/data receptacles, and filler plates to fill all the openings in the power base covers and desk-height cavity covers.

Specify Internode components when routing cable or power frame a spine wall to above or below worksurface mounts.

Tiles

Specify the style numbers and surface materials of all the tiles.

Draw an elevation view of both sides of each run of frames in the installation to help make sure you're including all the components in your specification and to help guide the installation. See example on next page.

Specify enhanced tiles for all frames manufactured after June 11, 2001.

Code each tile type and size with colors or a simple notation. Remember that frames with desk-height powerways will require 13"H tiles instead of 20"H tiles to allow space for the desk-height cavity covers. If you don't want access to the desk-height powerway's receptacle locations, you can use 20"H tiles on that side of the frame.

Worksurfaces

Specify style numbers and surface materials for worksurfaces.

Specify the supports separately. Remember that end-support brackets are ideal to support worksurfaces with clear kneespace underneath them. Using end-support brackets beside pedestals will produce a 1/2" gap between the end of the worksurface and the pedestal. To eliminate the gap, you can use the Montage pedestal without end-support brackets, and

the pedestal will be flush with the end of the worksurface. Or, you can use a cantilever along with a Context pedestal.

Specify a combination of on-module and off-module worksurface supports when supporting worksurfaces in off-module positions.

Order a supply of end-support brackets to support the back corners of corner worksurfaces and the visitor's side of bubble and jetty worksurfaces.

Add column legs to support bubble visitor, jetty, bubble jetty, and spanner worksurfaces. Each fanned spanner worksurface requires two column legs.

Remember that Montage pedestals can support some worksurfaces and eliminate the need for an end panel.

Avoid a Montage pedestal next to a cantilever because a small gap will result. Use a Context pedestal in these applications.

Avoid using two straight worksurfaces configured in a "L" because the torus edge on the front of one of the worksurfaces will butt the square edge on the side of the perpendicular worksurface.

Remember that worksurfaces mounted and supported off module use a combination of on-module and off-module supports.

Storage

Specify storage component style numbers, surface materials, and any specific keying information.

Specify off-module upper storage brackets for upper storage off-module applications.

Lighting

Specify style number and surface materials for all lights.

Example of Frame Run Elevations with Codes

N30	30" Non-Tackable (painted steel)	N48	48" Non-Tackable
F30	30" Non-Tackable (fabric over steel)	H48	48" High-Performance Acoustical
H30x13	30"W x 13"H High-Performance Acoustical	S48	48" Slatwall
S30x13	30"W x 13"H Slatwall	G48	48" Glass Package
C30	30" Desk Cavity Cover		

	30"	30"	48"	48"
65"	N30	N30	G48	G48
	N30	N30	N48	N48
	N30	N30	N48	N48

Tip: Don't duplicate your order for glass tile packages. Each glass tile package contains TWO glass tiles, so one package is sufficient for both sides of a frame.

Specifying Tips

For Montage Wood Selections

General Tips

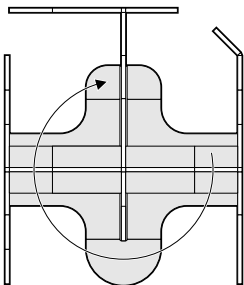

Standard Includes

- Case: paint
- Waterfall or rod pulls
- Dividers in box drawers
- Hanging file folder rail in file
- Lock in top drawer, key ran
- Polished Chrome
- Leveling glide
- Left- and right-hand filler ar

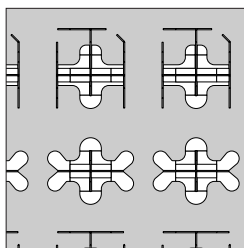

Review the features that are standard for each product before you begin to specify. You only need to include specifications for options, surface materials, and colors when you want a substitute for the standard.

To ensure that you do not overlook anything, approach the specifying process in a consistent order every time. Here are three common methods:

Specify products according to their order on the specifying pages.

Specify all workstations using a formulated pattern, such as starting at the entrance to a workstation and moving clockwise.

Specify each type of workstation in your installation and then determine how many of each type are needed.

Frames

Specify style numbers for all base frames and stack-on frames.

Specify enhanced standard frames, enhanced off-module frames, or a mix of both types of enhanced frames.

Specify enhanced stackers for use on enhanced frames.

Specify standard stackers for use on standard frames.

Choose frames with desk-height cavities factory installed for positions where you want to install desk-height powerways.

Keep track of which frames you want to accommodate power, and you'll have an easy way to cross-check with your specifications for powerkits and base covers. 45"H and 65"H frames accommodate powerways in their bases or at desk-height. 20"H frames accommodate cable routing but no other power distribution components.

Plan for 65"H or 86"H frames instead of a 45"H or 65"H frame with a 20"H frame stacked on top when the flexibility of variable heights is not needed. A single 65"H or 86"H frame will cost less than a 45"H or 65"H and a 20"H.

Add base covers and desk-height cavity covers to your list of specifications at the same time you specify frames so they are not overlooked.

Specify junctions by listing their style numbers and surface material.

No junctions are needed for frames that connect in a straight line at the same height or at different heights in off-module connections. But remember to specify end trim to finish the exposed portion of the taller frame.

Junctions are available to join frames in L, T, Y, X, V, and I configurations.

Specify junctions for use with lay-in cable tracks when specifying lay-in cable tracks.

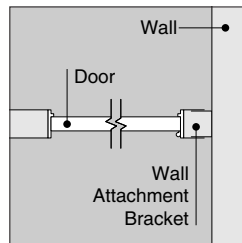

Specify a wall-attachment bracket if you want a way to adjust space when installing a wall between two fixed points or when you suspect that the wall you want to connect frames to is not plumb. Remember that the 86"H wall-attachment bracket has no top cap.

Specify enhanced frames for new customers and existing customers with new sites.

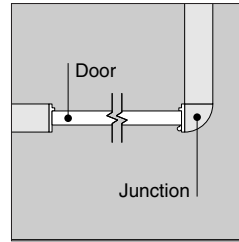

Specify end-of-frame or mid-frame off-module brackets when doing off-module frame connections.

Doors

Remember that door frames are not structural. Use a stack-on frame above a door frame to provide stability. For applications where no frame is going to be installed above the door, a special top cap linked to adjacent frames is required. Contact your Steelcase area office to discuss your application.

Specify a wall-attachment bracket to attach one side of a door frame to a building wall.

Use a junction on one side of a door frame to allow adjacent frames to be perpendicular to the door.

Determine if you need a left-hand or right-hand door by picturing yourself standing in the door frame with your back against the side of the frame with the hinges. If the door swings to your left, it's a left-hand door. If the door swings to your right, it's a right-hand door.

Wiring & Cabling

Specify a powerkit to correspond to the width of each frame with power. The frame-to-frame power connector cable that links adjacent powerkits together is included, so you don't need to order it.

Keep track of which surfaces will have desk-height cavity covers so that you can order smaller 13"H tiles for these frames.

Choose a base power-in to carry power from the floor of the building to the base of a frame. To extend power up to desk-height powerkits, you'll need to specify a base-to-desk-height power transfer cable. Remember that a power transfer cable must be routed through a junction.

Choose a top power-in to carry power from the ceiling down to either a powerkit at desk height or a powerkit in the frame base. Remember that a top power-in requires a power and cable pole of the appropriate size and that the power and cable pole must be positioned over a square L, T, or X junction to allow the top power-in cable to be routed.

Order covers. Plain base covers can be used in the bases of frames without powerkits or on the side of a frame where you don't want access to the powerkit's receptacle locations. Specify power base covers where you intend to have receptacles. Specify desk-height cavity covers for both sides of all the frames where you will have desk-height powerkits and want voice/data terminations and access to voice/data receptacles. Specify enhanced desk-height cavity covers for all frames manufactured after June 11, 2001.

Specify lay-in cable tracks, lay-in junction kits, lay-in change-of-height tracks, and end trims for use with lay-in tracks when lay-in cable management is desired.

Specify optional data openings below worksurface when extra voice/data plug-ins are needed.

Specify optional cable tray below the worksurface on a desk-height cavity cover when additional cord management is needed.

Specify power receptacles, voice/data receptacles, and filler plates to fill all the openings in the power base covers and desk-height cavity covers.

Specify Internode components when routing cable or power frame a spine wall to above or below wall mounts.

Tiles

Specify the style numbers and surface materials of all the tiles.

Draw an elevation view of both sides of each run of frames in the installation to help make sure you're including all the components in your specification and to help guide the installation. See example on next page.

Specify enhanced tiles for all frames manufactured after June 11, 2001.

Code each tile type and size with colors or a simple notation. Remember that frames with desk-height powerways will require 13"H tiles instead of 20"H tiles to allow space for the desk-height cavity covers. If you don't want access to the desk-height powerway's receptacle locations, you can use 20"H tiles on that side of the frame.

Worksurfaces

Specify style numbers and surface materials for worksurfaces.

Specify the supports separately. Remember that end-support brackets are ideal to support worksurfaces with clear kneespace underneath them. Using end-support brackets beside pedestals will produce a 1/2" gap between the end of the worksurface and the pedestal. To eliminate the gap, you can use the pedestal without end-support brackets, and the pedestal will be

flush with the end of the worksurface.

Specify a combination of on-module and off-module worksurface supports when supporting worksurfaces in off-module positions.

Order a corner worksurface bracket to support the back corner of corner worksurfaces and end support brackets to support the visitor's side of bubble and jetty worksurfaces.

Add column legs to support bullet and spanner worksurfaces.

Remember that pedestals can support some worksurfaces and eliminate the need for an end panel.

Avoid a Montage pedestal next to a cantilever because a small gap will result. Order flush-mount brackets for bridge and return application.

Remember to order flush-mount brackets for bridge and return application.

Avoid using two straight worksurfaces configured in a "L" because the edge profile on the front of one of the worksurfaces will butt the square edge on the side of the perpendicular worksurface.

Remember that worksurfaces mounted and supported off module use a combination of on-module and off-module supports.

Storage

Specify storage component style numbers, surface materials, and any specific keying information.

Specify off-module upper storage brackets for upper storage off-module applications.

Lighting

Specify style number and surface materials for all lights.

Compatibility Tips

Montage frames have been enhanced to offer off-modular planning. The attachment method on some Montage components has changed to accommodate this enhancement. On-module frames have also been enhanced to accept the new tile attachment method. The old standard frames and some of its components have been moved to the *Transitional Specification Guide*. Below is a matrix to use as a specification tip when specifying Montage frames and frame components for installed base and new installations.

Montage Enhancements Compatibility Matrix

Door Frames

SIN 711.1

Tip: Door frames are not structural. Use a stack-on frame above a doorway to provide stability. For applications where no frame is going to be installed above the door frame, a special top cap linked to adjacent frames is required. Contact your Steelcase area office to discuss your application.

Tip: You can order hollow-core doors locally to install in Montage door frames.

Tip: Special four-hinge frames required for veneer or heavier custom doors.
 ▶ See *Specials Handbook*.

Wood Top Caps

SIN 711.1

Top Cap

Junction Top Cap

Tip: All wood top caps have a square edge profile.

Tip: Wood top cap for junction package includes an aluminum junction bracket for proper alignment.

Tip: Top caps are solid wood and offered in wood finishes that match open-pore natural veneer finishes.

Tip: Wood top cap is already included with wood junction frame kits.

Tip: The fifth digit of the wood junction top cap style number indicates the junction (L, T, or X) to be used in the application.

Montage

Enhanced Non-Tackable Tiles

SIN 711.1

Tip: Standard warp direction on fabric-wrapped tiles is warp horizontal.

Tip: Perforated, indented, and dome tile pattern options are not available on fabric-covered tiles. Pattern options are not available on tiles with cutout and base fiber-in.

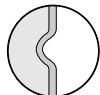

Tip: Perforated tiles ship with metal septum, which will block cable and power routing when used back-to-back.

Tip: Dome tiles cannot be used behind off-module bracket connections.

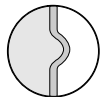

Decoding pattern numbers

P= Perforated
I = Indented
D= Dome

Number indicates the quantity of holes or indentations in a 2"W x 1 3/8"H area.

Cross-section through indented tile

Cross-section through dome tile

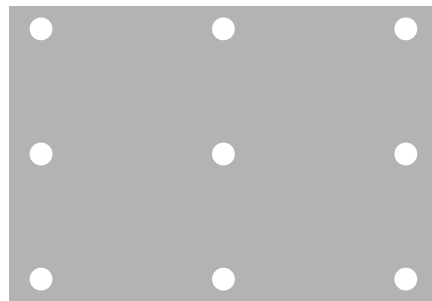

Standard Includes		Required to Specify	
	<ul style="list-style-type: none"> Tile: paint price group 1 Wedge-shaped connector, if applicable: black plastic only 6'-long, 3/4" inside diameter conduit, on base fiber-in only: black plastic only 		<ul style="list-style-type: none"> 1 Style number 2 Paint color number for tile surface 3 Options, if selected (see below) <p>▶ See <i>Surface Materials</i>, page C252.</p>

Montage

Bracket Application Rules

for Overhead Bin and Full-Height Shelf

On-Module Brackets

On-module brackets

are used to mount bins and shelves to panels with vertical slot patterns.

On-module attachment brackets install in panel seams.

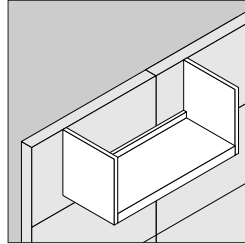

Width of overhead storage unit must match the width of the panel or panels that it is attached to.

Additional support for stability may be required when shelves and overhead storage bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

Tip: See Panel Stability Guidelines.

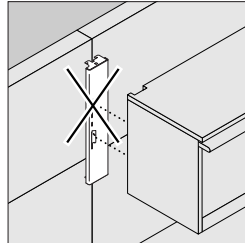

► See *Montage Solutions Specification Guide*.

Off-Module Brackets

Off-module brackets, optional, accommodate off-module installations of bins and shelves on panels with horizontal slot patterns. Enhanced off-module Montage frames can support off-module brackets. Off-module brackets push bins and shelves $\frac{3}{4}$ " from frame.

Enhanced off-module Montage frames have horizontal slot patterns and must be specified for off-module Montage configurations.

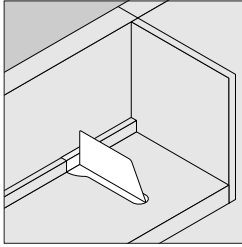

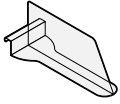

Off-module brackets cannot span a vertical or joint where two frames come together on enhanced off-module Montage frame. Shift bin or shelf to avoid joint.

Montage

Bracket Application Rules

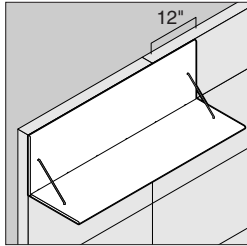

for Curved Front Bin and L-Shelf

Basic Brackets

Basic brackets are used to mount bins and shelves to panels with vertical slot patterns. Basic attachment brackets push bins and shelves $\frac{1}{4}$ " from frame.

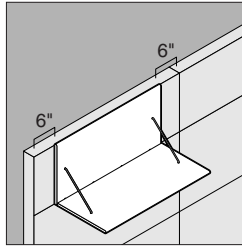

Width of overhead bin or shelf must match or be wider than the width of the panel or panels that it is attached to.

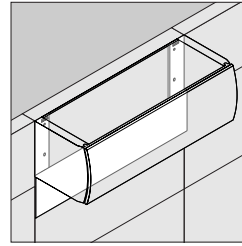

Basic attachment brackets install in panel seams and allow bins and shelves that are wider to be attached. Total width of bin or shelf can extend 12" beyond the bracket on one side.

Full Off-Module Brackets

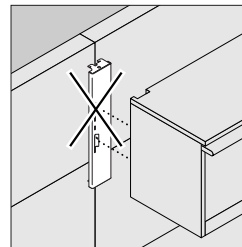

Full off-module brackets, optional, accommodate off-module installations of bins and shelves on panels with horizontal slot patterns. Enhanced off-module Montage frames can support full off-module brackets. Full off-module brackets push bins and shelves $\frac{1}{2}$ " from frame.

Coverplates are included with brackets for use on enhanced off-module Montage frames. Coverplate extends below the bin or shelf to conceal the bracket. Height of coverplate for enhanced off-module Montage is $6\frac{1}{2}$ ".

Enhanced off-module Montage frames have horizontal slot patterns and must be specified for full off-module Montage configurations.

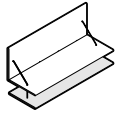

Off-module brackets cannot span a vertical or joint where two frames come together on enhanced off-module Montage frame. Shift bin or shelf to avoid joint.

Add-On Shelves

for Curved Front Bin and L-Shelf

SIN 711.1

Stationary Shelves

Tip: Stationary shelf hangs 5½" from the bottom of curved front bins and L-shelves. Specify the same width as corresponding bin or L-shelf.

Tip: Shelf is steel with molded endcaps.

30"	48"	ZEWC3048W__	\$667	\$734	\$794

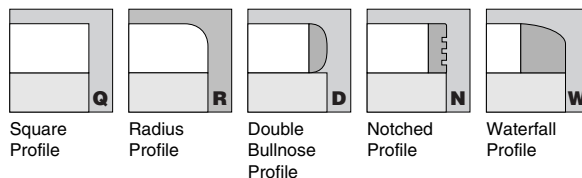

Edge Profile Location

Tip: Your specification is not complete until you add a suffix to define the work-surface's edge profile.

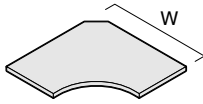

Tip: On wood veneer corner worksurfaces, the bullnose (B) profile is not available.

Edge Profiles

Wood Veneer Cornerstone Worksurfaces

SIN 711.1

Tip: When mounting work-surfaces off module, you must use a combination of on-module and off-module supports.

Standard Includes

- Worksurface: wood veneer
- Edge profile: wood, except square profile which is wood veneer

Required to Specify

- 1 Style number with appropriate edge-profile suffix
 - ▶ See edge-profile suffixes at bottom of page.
- 2 Wood veneer color number for worksurface
- 3 Options, if selected (see below)
 - ▶ See *Surface Materials*, page C252.

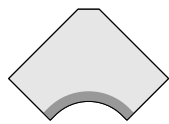

Options

Options	Price	Required to Specify
Surface Materials		
• Full-fill finish	+\$41	Specify <i>with full-fill finish</i> and select wood color number.
• Customiz stain on wood	+\$41	Specify <i>with Customiz stain</i> . ▶ See <i>Surface Materials Reference Manual</i> .

Supports	Price	Required to Specify
• End panels		▶ Page C185
• Off-module end panels		▶ Page C185
• Cantilevers		▶ Page C186
• Corner worksurface bracket		▶ Page C187
• Side-support brackets		▶ Page C187
• Off-module worksurface brackets		▶ Page C188
• Off-module tie plates		▶ Page C188
• End-of-run cantilevers		▶ Page C188

Specification Information

Dimensions D W	Style Number	Base Price		
		Profile Q and R	Profile D and N	Profile W
24" 42"	ZEWCS2442W _	\$719	\$791	\$856
24" 48"	ZEWCS2448W _	\$731	\$804	\$870
30" 42"	ZEWCS3042W _	\$762	\$838	\$907
30" 48"	ZEWCS3048W _	\$774	\$851	\$921

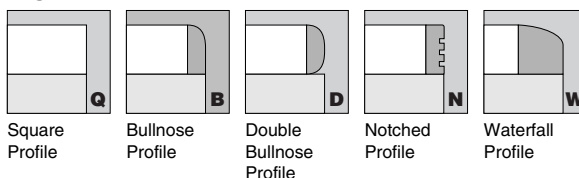

Edge Profile Location

Tip: Your specification is not complete until you add a suffix to define the work-surface's edge profile.

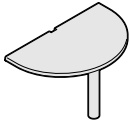

Tip: On cornestone work-surfaces, the radius (R) profile is not available because the edge is curved.

Edge Profiles

Wood Veneer Spanner Worksurfaces

SIN 711.1

Tip: You can specify only one type of cable-management option on a work surface.

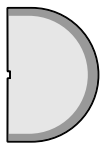

Tip: If a plastic color is not specified for a grommet with color choices, 6000 Black plastic will be provided.

Tip: Grommets must be used for cable drops.

Tip: When mounting work-surfaces off module, you must use a combination of on-module and off-module supports.

Tip: 51" wide spanner-style tables are used with two 24"D work surfaces.

Tip: 63" wide spanner-style tables are used with two 30"D work surfaces.

Edge Profile Location

Tip: Your specification is not complete until you add a suffix to define the work surface's edge profile.

Tip: On spanner work-surfaces, the radius (R) profile is not available because the edge is curved.

Standard Includes	Required to Specify
-------------------	---------------------

- Worksurface: wood veneer
- Support column: all paint price groups
- Edge profile: wood, except square profile which is wood veneer

- 1 Style number with appropriate edge-profile suffix
▶ See edge-profile suffixes at bottom of page.
- 2 Wood veneer color number for work surface
- 3 Options, if selected (see below)
▶ See *Surface Materials*, page C252.

Surface Materials	Options	Price	Required to Specify
-------------------	---------	-------	---------------------

Surface Materials	• Full-fill finish	+\$ 60	Specify with <i>full-fill finish</i> and select wood color number.
	• Customiz stain on wood	+\$ 60	Specify with <i>Customiz stain</i> . ▶ See <i>Surface Materials Reference Manual</i> .

Support column

- Paint No cost
- Polished Chrome +\$ 99
- Antique Bronze +\$131

Select paint color number for support column.
Specify with *9201 Polished Chrome support column*.
Specify with *9230 Antique Bronze support column*.

Cable Management	Three-piece grommet	Price	Required to Specify
------------------	---------------------	-------	---------------------

- Centered on straight end 2" from edge: plastic +\$ 25

Specify with *E91RET4* and select plastic color number.

4" square grommet

- Centered on straight end 2" from edge: black plastic only +\$ 25

Specify with *WWTPC*.

Supports	Shared cantilevers	Price	Required to Specify
----------	--------------------	-------	---------------------

- Two shared cantilevers (one left and one right) must be used to support a spanner work surface.
- Adjustable column

Wood Veneer Standing-Height Mobile Cabinet

SIN 711.1

Standard Includes	Required to Specify
-------------------	---------------------

- Mobile cabinet: wood veneer
- One lateral file drawer
- Two display shelves
- Four shelves
- Drawer pull
- Storage handle: black paint
- Two locking and two non-locking casters: black plastic only

- 1 Style number with appropriate edge-profile suffix
▶ See edge-profile suffixes at bottom of page.
- 2 Wood veneer color number for mobile cabinet
- 3 Drawer pull shape and finish number
- 4 Options, if selected (see below)
▶ See *Surface Materials*, page C252.

Options	Price	Required to Specify
---------	-------	---------------------

Surface Materials	• Customiz stain on wood	+\$173	Specify with <i>Customiz stain</i> . ▶ See <i>Surface Materials Reference Manual</i> .
	• Full-fill finish on wood worksurface only	+\$ 75	Specify with <i>full-fill finish</i> .
Drawer Pull Shape	• Lip drawer pull	No cost	Specify with <i>lip drawer pull E030</i> and select 0835 Black, 9201 Polished Chrome, or 9230 Antique Bronze.
	• Flush drawer pull	No cost	Specify with <i>flush drawer pull E020</i> and select 0835 Black, 9201 Polished Chrome, or 9230 Antique Bronze.
	• Crescent drawer pull	+\$ 22 each	Specify with <i>crescent drawer pull E040</i> and select 0835 Black, 9201 Polished Chrome, 9230 Antique Bronze, or 9213 Polished Nickel.
	• Contemporary drawer pull	+\$ 22 each	Specify with <i>contemporary drawer pull E070</i> and select 0835 Black, 9201 Polished Chrome, or 9212 Silver.
	• Traditional drawer pull	+\$ 22 each	Specify with <i>traditional drawer pull E080</i> and select 9230 Antique Bronze.
	• Bow drawer pull	+\$ 22 each	Specify with <i>bow drawer pull E060</i> and select 0835 Black or 9211 Nickel.
	• Rail drawer pull	+\$ 22 each	Specify with <i>rail drawer pull E050</i> and select 0835 Black or 9211 Nickel.

Tip: If you specify 9201 Polished Chrome or 9213 Polished Nickel drawer pulls, the color of the storage handles will match the pulls. Otherwise, the storage handles will be black.

Tip: Depth dimension does not include bow front.

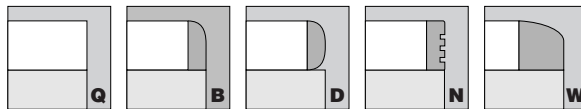

Edge Profile Location

Tip: Your specification is not complete until you add a suffix to define the work-surface's edge profile.

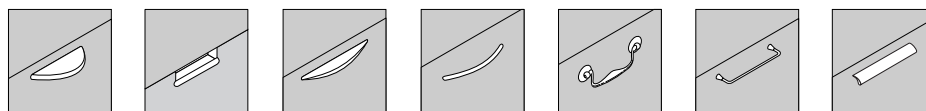

Tip: The edge profiles for wood veneer standing-height mobile cabinet are wood veneer (Q) and wood (B, D, N, and W).

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders and the Surface Materials Tool Box.

Surface Materials Binders

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Surface Materials Tool Box

- (S8150) provides 3" x 3" samples of the following surface materials:
- Vertical surface fabrics
 - Seating upholstery
 - Wood veneer
 - Paint
 - Laminate

Paint

Applies to:

- Frame top caps
- Door frames
- Junctions
- Wall attachment brackets
- Vertical end trim
- Power and cable poles
- Base covers
- Power and data desk-height cavity covers
- Non-tackable tiles
- Slatwall
- Adjustable columns
- Adjustable-height worksurface bases
- End panels
- Pedestals
- Shelves
- Overhead storage bins
- Canopy lights
- Shelf lights
- Waterfall and Rod pulls (paint price group 1 and PerfectMatch II paints only)
- Contemporary pulls (0835 Black only)

Price Group 1

Textured Paint

- 7207 Black
- 7225 Sand (Vanadium)
- 7236 Fog
- 7237 Slate
- 7238 Fieldstone
- 7239 Midnight

Price Group 2

Metallic Paint

- 4750 Champagne
- 4751 Bronze
- 4752 Steel
- 4788 Gold Dust
- 4798 Sterling
- 4799 Platinum

Price Group 3

Accent Paint

Please see the Accent Paint swatch card in the *Surface Materials Finishes Binder* for a complete list of these colorful paints.

PerfectMatch II Paint

PerfectMatch II is a service that allows you to create your own paint color. Refer to the *Surface Materials Reference Manual* for more information about this program.

Laminate

Applies to:

- Doors
 - Worksurfaces
 - Tiles
- 2722 Cream
 - 2729 White Sand
 - 2730 Arctic White
 - 2746 Black
 - 2759 Warm White
 - 2810 Dawn
 - 2811 Mist
 - 2820 Coffee Speckle
 - 2822 Woodrose Speckle
 - 2823 Driftwood Speckle
 - 2824 Smoke Speckle
 - 2825 Vanadium Speckle
 - 2850 Vanadium Fiber
 - 2851 Rhyme Fiber
 - 2852 Tungsten Fiber
 - 2854 Vellum Fiber
 - 2857 Stream Fiber
 - 2859 Novell Fiber
 - 2860 Granite Fiber
 - 2870 Blonde Bronze Patina
 - 2871 Blackened Bronze Patina
 - 2872 Silver Plate Patina
 - 2873 Instant Iron Patina

Woodgrain Laminate

Woodgrain laminates are designed to simulate the appearance of wood and coordinate with select wood finishes. For additional information, refer to the *Surface Materials Reference Manual*.

Applies to:

- Doors
 - Tiles
 - Worksurfaces
- ▶ See page C259 for wood-grain illustrations.

Woodgrain Laminate Choices

- 2412 Natural Cherry
- 2422 Medium Cherry
- 2511 Winter on Maple
- 2592 Blonde on Maple
- 2632 Medium Oak
- 2714 Natural Walnut
- 2772 Medium Mahogany on Walnut

Accent Laminate

Accent laminates are available with an upcharge of \$60 U.S. per worksurface, door, or laminate tile.

Please see the accent laminate swatch card within the *Steelcase Surface Materials Finishes Binder* for a complete listing of these colorful laminates. For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Open Line Laminate

This service allows you to order non-standard laminate at an additional processing fee upcharge of \$60 per worksurface, door, or laminate tile, plus the cost of the laminate. For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Steelcase carefully selects veneer and solid wood or consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be arranged periodically to ensure even aging of wood surfaces.

Veneers are flat cut and are matched for proper balance and consistency.

Open-pore finish is a medium-gloss finish that leaves the wood texture visible to the eye and distinguishable to the touch.

Applies to:

- Montage Wood Selections products
- End trim
- Top caps
- Tiles
- Torus edge tops
- Wood junctions

Open-pore finish choices

- 3412 Natural Cherry
- 3422 Medium Cherry
- 3562 Linseed on Maple
- 3572 Amber Maple on Maple
- 3582 Winter on Maple
- 3592 Blonde on Maple
- 3632 Medium Oak
- 3642 Natural Oak
- 3712 Natural Walnut
- 3722 Dark Mahogany on Walnut
- 3742 Autumn Walnut
- 3772 Medium Mahogany on Walnut
- 3792 Black Walnut

Full-fill finish is a medium-gloss finish that completely fills the grain and has a lustrous, satin look and feel. Full-fill finish is available on wood worksurfaces only.

Full-fill finish choices

- 3414 Natural Cherry
- 3424 Medium Cherry
- 3534 Winter on Maple
- 3544 Blonde on Maple
- 3564 Linseed on Maple
- 3574 Amber on Maple
- 3634 Medium Oak
- 3644 Natural Oak
- 3714 Natural Walnut
- 3724 Dark Mahogany on Walnut
- 3744 Autumn Walnut
- 3774 Medium Mahogany on Walnut
- 3794 Black Walnut

Customiz stain is a service that allows you to create your own stain colors on standard veneers. Customiz stain color is available on all product lines that offer wood veneer.

A one-time formulation fee of \$400 per color, per customer processing fee will apply. The fee covers the cost of formulating the Customiz finish and applies regardless of whether or not an order for product is placed. Please refer to "Customiz Stain" option price guide in your specification guide for the unit upcharge.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by specials engineering. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Plated Metal

Applies to:

- Waterfall pull and rod
- Montage Wood Selections products

- 9201 Polished Chrome**
- 9210 Copper
- 9211 Nickel
- 9212 Silver
- 9213 Polished Nickel**
- 9230 Antique Bronze**
- 9250 Ember Chrome**

**Not available on Montage steel pedestals

Metal

Applies to:

- Canopy Lights

- 8043 Clear Anodized Aluminum

Plastic

Tip: Plastic and vinyl products may not be available in all colors listed below.

▶ See page C255 for an overview of the plastic colors available for each component.

Applies to:

- Montage Wood Selections products

- 6000 Black
- 6001 Coffee
- 6607 Woodrose
- 6608 Driftwood
- 6612 Grey V2
- 6654 Sand (Vanadium)
- 6655 Warm White
- 6695 Midnight
- 6697 Fog

Applies to:

- Enhanced off-module frame attachment brackets
- Vertical wire managers

- 6000 Black
- 6659 Light Grey

Vertical Surface Fabric

Applies to:

- Non-tackable tiles
- Tackable acoustical tiles
- High-performance tackable acoustical tiles
- Consolidation point locking door tiles

Classics Collection

Surface materials in the Classics Collection are timeless. These materials should be available for a minimum of 10 years from the date the material is introduced into the Classics Collection. The Classics Collection includes the following fabrics in Price Groups 1 through 3:

Price Group 1

- Abacus*
- Acadia*
- Bariolage
- Belgrade
- BellaRose*
- Boccie**
- Cornice*
- Embrasure*
- *Not available on 80"H panels
- **Not available on panels taller than 68"H

Additional fabrics are available in this price group. Call Designtex at 1.800.221.1540 for further information about the Graded-In Program.

Price Group 2

- Amiranté
- Ashanti
- Ashanti Reverse
- Bouquet*
- Cordial
- Firenze
- Firenze Reverse
- Fresco
- Milano
- Racquets**
- Regatta
- Wilshire

*Not available on 80"H panels
**Not available on panels taller than 68"H

Additional fabrics are available in this price group. Call Designtex at 1.800.221.1540 for further information about the Graded-In Program.

Price Group 3

Martinique
▶ See *Surface Materials Reference Manual* for a listing of available fabric colors.

Designtex Graded-In Program

All Designtex Graded-In fabrics are now supported just like standard fabrics when ordered on Steelcase furniture. The Designtex Graded-In Program also includes the Environmental Impact Collection, which offers sustainable textiles in affordable price groups. For additional information and fabric samples, contact your local Designtex sales representative at 1.800.221.1540.

Designtex fabrics are graded into Steelcase Price Groups 1 through 3:

Price Group 1

- Moors (Environmental Impact Collection)

Price Group 2

- About Face
- Acres
- Bracken (Environmental Impact Collection)
- Brunswick
- Cut to the Chase
- Gimlet
- Niche
- Senecal
- Solitaire
- Streams (Environmental Impact Collection)

Price Group 3

- Apex
- Dalmatian
- Foxtrot
- Lotto
- Meringue
- No Deposit No Return
- Pick Up Sticks
- Rain (Environmental Impact Collection)
- Sea Breeze (Environmental Impact Collection)
- Six Pack
- Sumo
- That Straw Stuff

▶ See *Surface Materials Reference Manual* for a listing of available fabric colors.

Price Group COM (Customer's Own Material)

Fabric Approval and Yardage

To confirm whether a particular COM material has already been tested for use on a specific Steelcase product or to determine actual yardage requirements:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

You can find the same information on the in2 site. Follow these steps:

- Visit www.in2.steelcase.com
- Click on "Sales/Design Team"
- Select "Surface Materials"
- Select "Customer's Own Material"

For additional information regarding Customer's Own Material, call 1.888.STEELCASE.

Transitional

▶ See the *Transitional Specification Guide* for a list of transitional surface materials.

Specification Guidelines for Vertical Fabric Applications

Standard warp direction on all Montage tiles is warp horizontal.

Fabric-covered tiles ordered before October 16, 1995,

were fabricated with warp horizontal or warp vertical depending on the fabric. Now all tiles will be warp horizontal.

Tip: If you're ordering tiles to match those in an existing installation, you may want to specify the fabric with warp vertical.

▶ See table at right.

Steelcase is not responsible for charges associated with replacement or reupholstery of tile surfaces due to incorrect specifications.

Application Topics

Surface materials consultants are available to answer your questions and to provide clarification about COM availability, testing, yardage requirements, etc. Call 616.246.9822.

For flammability ratings, see *Flammability Ratings for Steelcase Panel Systems*, page A16.

Price

No additional cost to specify warp direction.

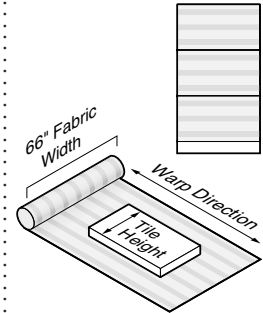

How to Specify

You must specify warp direction when you need to depart from the standard. Fabric direction on Montage tiles can be specified electronically. On non-electronic orders, add a written specification to each tile to indicate non-standard warp directions.

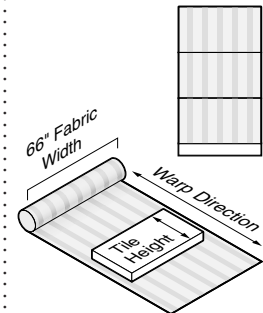

Warp Directions for Montage Tiles

Fabric		Before October 16, 1995	October 16, 1995 and After
Abacus	D	N.A.	H
Acadia	D	N.A.	H
Amiranté	D	V	H
Ashanti	D	V	H
Ashanti Reverse	D	V	H
Bariolage	D	N.A.	H
Belgrade	D	N.A.	H
BellaRose	D	N.A.	H
Bouquet	D	N.A.	H
Cordial	D	V	H
Cornice	D	N.A.	H
Embrasure	D	N.A.	H
Firenze	D	H	H
Firenze Reverse	D	H	H
Fresco	D	H	H
Martinique	D	V	H
Milano	D	H	H
Racquets	D	N.A.	H
Regatta	ND	H	H
Wilshire	D	H	H

D = Directional
 ND = Non-directional
 H = Wrap Horizontal
 V = Wrap Vertical

Warp horizontal means the height dimension of the tile is perpendicular to the warp of the fabric.

Warp vertical means the height dimension of the tile is parallel to the warp of the fabric.

Wood Grain Directions

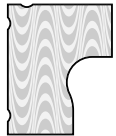

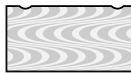

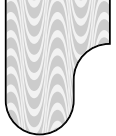

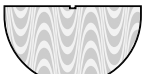

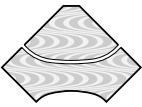

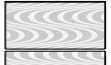

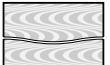

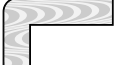

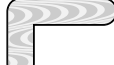

Montage

Directional laminates are standard with the grain directions shown.

*Adjustable-height worksurfaces not available in wood veneer.

**Grain direction will run parallel to the longest edge.

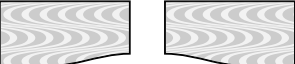

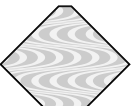

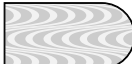

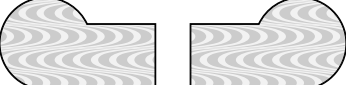

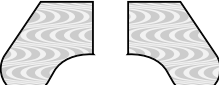

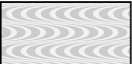

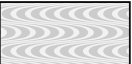

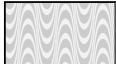

Torus Edge Worksurfaces

					
Corner Worksurface	Extended Corner Worksurface	Extended Corner Cove Worksurface	Straight Worksurface	Bubble Visitor Worksurface	Jetty Worksurface

Natural wood veneers do not have mitered corner surfaces.

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

How to Care for Laminate, Torus Edge, and Wood Surfaces

Laminate

Cleaning

Wiping with a damp cloth will remove general soiling and water-borne stains. If needed, use a hard-surface, all-purpose cleaner such as Formula 409, Fantastik, Top Job, Mr. Clean, etc. Some oil-borne stains may require the use of a dry-cleaning fluid. To fill scratches in wood grain laminate tops, use an oak, walnut, or mahogany putty stick (available at paint supply and hardware stores).

Torus Edge

Cleaning

Wiping with a damp cloth will remove general soiling and water-borne stains. If needed, use a hard-surface, all-purpose cleaner such as Formula 409, Fantastik, Top Job, Mr. Clean, etc. Some oil-borne stains may require the use of a dry-cleaning fluid.

Wood

Protection

Use desk pads and coasters to help protect the finish against dents, scratches, moisture and hot and cold liquids. Do not use desk pads that have plastic backing.

Use felt or leather pads on the bottoms of office equipment and accessories.

Lift objects when you move them, instead of pulling or pushing them across the surface, to avoid scratching the surface.

Periodically move desk accessories and other objects kept on the work-surface to ensure even aging.

Avoid leaving vinyl binders on work-surface for long periods.

If you use a protective glass top, insert felt pads between the glass and the work-surface, to create an air space and allow the wood to breathe.

Keep your furniture away from direct sunlight.

Avoid extreme temperatures and humidity. Maintain temperatures between 60 and 80 degrees Fahrenheit and humidity levels between 30 and 50 percent.

Cleaning

Keep a supply of soft, clean, absorbent cloths handy for wiping up spills and regular dusting.

Dusting
Clean with a slightly damp, soft cloth, using another soft cloth to dry. Always wipe the surface in the direction of the wood grain.

Cleaning
Use a quality cleaner or flax soap formulated especially for use on wood surfaces. Do not use oils or ammonia. Dilute the cleaner as directed by the manufacturer. Dampen but do not saturate a soft cloth with the diluted cleaning solution. Wipe the surface in the direction of the wood grain to remove dirt and fingerprints. Wipe the surface clean with a soft, dry cloth.

Waxing
Quality spray wax may be applied sparingly twice a year. Excessive waxing may result in a wax build-up which feels sticky and attracts an unusual amount of dirt. For information about how to remove this wax, contact your facilities department or Steelcase dealer.

Hardware
Clean metal finishes with a non-abrasive cleaner. Apply the cleaner sparingly, making sure that it does not come into contact with the wood. Wipe the hardware dry with a clean, soft cloth.

Help with Repair and Maintenance
Wood is a "forgiving" material which usually can be repaired. If your work-surface is damaged, call your facilities department or Steelcase dealer.

Many Steelcase dealers offer maintenance contracts for your convenience. Contact your dealer for more information.

Montage

Lock and Keying

C262

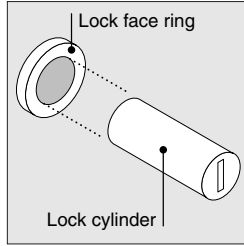

Montage

Lock and Keying

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Exceptions: Individual locking drawers are available only with field-installed

locks. 900 Series overfiles are available only with factory-installed locks.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

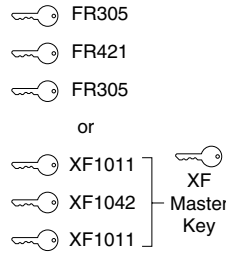

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture

units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.
▶ See below.

Key Random

Required to Specify

	Master key	+\$20	Specify with master key
	random		random.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.
Exception: 900 Series overfiles are available only with factory-installed locks.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.
Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).
Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

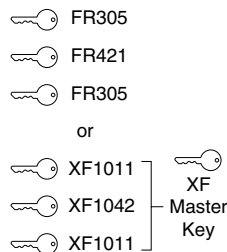

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.
Tip: Designate the quantity per key number in your specification.
▶ See example at right.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

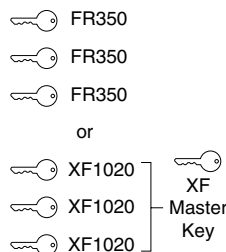

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR FR320
5	LOCK9201FR FR350
15	LOCK9201XF XF1100
30	Total
1	877102003SR standard lock tool
1	877102002SR master lock tool

Corner, Curved-Front Worksurfaces

Laminate or Wood Veneer

SIN 711.1

Tip: Supports must be specified separately, including side support brackets for rear corner support in panel-mounted applications.

Standard Includes

- Worksurface: laminate or wood veneer
- Laminate worksurface:
 - Vinyl 3 mm edge profile or plastic P-edge profile on front edge
 - Plastic default flat profile on side and back edges
- Wood worksurface:
 - Wood 3 mm edge profile on front edge
 - Matching veneer flat profile on side and back edges
- Cable scallop on back edge

Required to Specify

- 1 Style number with appropriate edge profile suffix in the space provided
 - P** Laminate with vinyl P-edge
 - SW** Wood with square edge
 - ▶ See edge profiles below
- 2 Laminate or wood color number for worksurface
- 3 Plastic color number for front edge on laminate worksurface, if selected
- 4 Options, if selected (see below)
 - ▶ See *Surface Materials*, page D102.

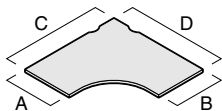

Options

Options	Price	Required to Specify
Surface Materials		
Laminate worksurfaces		
• Accent laminate	+\$60	▶ See <i>Surface Materials Reference Manual</i> .
• Open Line laminate	+\$60 plus cost of laminate	▶ See <i>Surface Materials Reference Manual</i> .
Wood veneer worksurfaces		
• Customiz stain	Prices below	Specify with <i>Customiz stain</i> . ▶ See <i>Surface Materials Reference Manual</i> . Specify full-fill finish number.
• Full-fill finish	Prices below

Extended Corner, Straight-Front Worksurfaces with Adjustable Keyboard Shelf

Laminate or Wood Veneer

SIN 711.1

Tip: Illustration above shows a left-hand worksurface.

Tip: Supports must be specified separately, including side support brackets for rear corner support in panel-mounted applications.

Tip: Keyboard mechanism requires field attachment to the worksurface and keyboard shelf.

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number (for example, US1830 becomes US1830SW for wood with square edge profile).

Standard Includes

- Worksurface: laminate or wood veneer
- Laminate worksurface:
 - Vinyl 3 mm edge profile or plastic P-edge profile on front edge
 - Plastic default flat profile on side and back edges
 - Vinyl 3 mm edge profile or plastic P-edge profile on all edges of keyboard shelf
- Wood worksurface:
 - Wood 3 mm edge profile on front edge
 - Matching veneer flat profile on side and back edges
 - Wood 3 mm edge profile on all edges of keyboard shelf
- Cable scallops on back edges
- Keyboard mechanism

Required to Specify

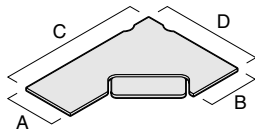

- 1 Style number with appropriate edge profile suffix in the space provided
 - P** Laminate with vinyl P-edge
 - SW** Wood with square edge
 - ▶ See edge profiles below
- 2 Laminate or wood color number for worksurface
- 3 Plastic color number for edges on laminate worksurface, if selected
- 4 Options, if selected (see below)
 - ▶ See *Surface Materials*, page D102.

Options Price Required to Specify

Surface Materials	Options	Price	Required to Specify

Corner, 120° Worksurfaces

Laminate or Wood Veneer

SIN 711.1

Tip: Supports must be specified separately, including side support brackets for rear corner support in panel-mounted applications.

Tip: Corner, 120° worksurfaces cannot be supported by Montage frames.

▶ See Montage chapter in the Specials Handbook for 120° planning.

Standard Includes	Required to Specify
-------------------	---------------------

- Worksurface: laminate or wood veneer
- Laminate worksurface:
 - Vinyl 3 mm edge profile or plastic P-edge profile on front edge
 - Plastic default flat profile on side and back edges
- Wood worksurface:
 - Wood 3 mm edge profile on front edge
 - Matching veneer flat profile on side and back edges
- Cable scallop on back edge

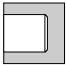

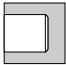

- 1 Style number with appropriate edge profile suffix in the space provided
 - P** Laminate with vinyl P-edge
 - SW** Wood with square edge
 - ▶ See edge profiles below
 - 2 Laminate or wood color number for worksurface
 - 3 Plastic color number for front edge on laminate worksurface, if selected
 - 4 Options, if selected (see below)
- ▶ See Surface Materials, page D102.

Angled Peninsula, Curved-Front Worksurfaces

Laminate or Wood Veneer

SIN 711.1

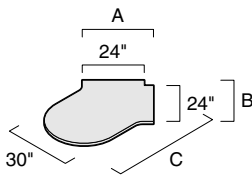

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

Tip: P-edge profile and wood veneer angled peninsula, curved-front worksurfaces include alignment slots to accept two cabby legs or two elliptical legs for support in panel-mounted applications.

Tip: Angled peninsula, curved-front worksurfaces are recommended for use with other curved-front shapes such as corner, curved-front worksurfaces.

▶ Page D8

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number (for example, US1830_ becomes US1830SW for wood with square edge profile).

Standard Includes

- Worksurface: laminate or wood veneer
- Laminate worksurface:
 - Vinyl 3 mm edge profile or plastic P-edge profile on front edge
 - Plastic default flat profile on side and back edges
- Wood worksurface:
 - Wood 3 mm edge profile on front edge
 - Matching veneer flat profile on side and back edges

Required to Specify

- 1 Style number with appropriate edge profile suffix in the space provided
 - P** Laminate with vinyl P-edge
 - SW** Wood with square edge
 - ▶ See edge profiles below
- 2 Laminate or wood color number for worksurface
- 3 Plastic color number for front edge on laminate worksurface, if selected
- 4 Options, if selected (see below)
 - ▶ See *Surface Materials*, page D102.

Options

Surface Materials	Options	Price	Required to Specify

Adjustable-Height Worksurfaces

Laminate, with Crank
SIN 711.1

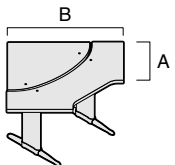

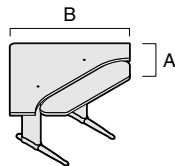

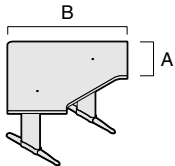

Tip: Adjustable-height work-surfaces are available in laminate only.

Tip: Adjustable-height mechanism requires assembly and attachment to the work surface.

Tip: 48"W dual corner and bi-level corner worksurfaces can support both a keyboard and a mouse pad on the same surface.

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number (for example, US1830_ becomes US1830SW for wood with square edge profile).

Standard Includes

- Worksurface: laminate
- Vinyl 3 mm edge profile or P-edge profile on front edge of worksurface: plastic
- Flat profile on side and back edges of worksurface: plastic default
- Vinyl 3 mm edge profile or P-edge profile on all sides of keyboard shelf: plastic
- Adjustable-height mechanism
- Leg shrouds and feet: paint price group 1
- Crank handle
- Attachment hardware

Required to Specify

- 1 Style number with appropriate edge profile suffix in the space provided
 - ▶ Laminate with vinyl P-edge
- ▶ See edge profiles below
- 2 Laminate color number for worksurface
- 3 Plastic color number for edges
- 4 Paint color number for leg shrouds and feet
- 5 Options, if selected (see below)
 - ▶ See *Surface Materials*, page D102.

Legs and Tether Bracket for Universal Freestanding Worksurfaces	D74
--	------------

Straight Worksurfaces

Laminate or Wood Veneer

SIN 711.1

Standard Includes	Required to Specify
-------------------	---------------------

- Worksurface: laminate or wood veneer
- Laminate worksurface: plastic P-edge profile on all sides
- Wood worksurface: wood square 3 mm, wood tapered, or 6000 Black plastic P-edge profile on all sides
- Reinforcing brace for worksurfaces wider than 60"W

- 1 Style number with appropriate edge profile suffix in the space provided
 - P** Laminate with vinyl P-edge
 - V** Wood with vinyl P-edge
 - SW** Wood with square edge
 - BW** Wood with tapered edge
- ▶ See edge profiles at right
- 2 Laminate or wood color number for worksurface
- 3 Plastic color number for P-edge on laminate worksurface, if selected
- 4 Options, if selected (see below)
- ▶ See *Surface Materials*, page D102.

Options	Price	Required to Specify
---------	-------	---------------------

Surface Materials	Laminate worksurfaces	
	<ul style="list-style-type: none"> • Accent laminate +\$60 • Open Line laminate +\$60 plus cost of laminate 	<ul style="list-style-type: none"> ▶ See <i>Surface Materials Reference Manual</i>. ▶ See <i>Surface Materials Reference Manual</i>.

Worksurfaces

Corner, 120° Worksurfaces

Laminate or Wood Veneer

SIN 711.1

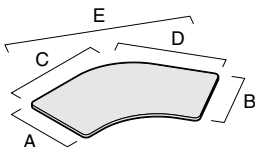

Tip: Legs to support free-standing worksurfaces must be specified separately.

Tip: For leg and support guidelines, refer to the Leg Matrix.

▶ See Unison Specification Guide.

Tip: Tether brackets to attach to Pathways Post and Beam fence must be specified separately.

Tip: Your specification is not complete until you add a suffix to the style number to define the edge profile (for example, BZC302460 becomes BZC302460V for wood with vinyl P-edge profile).

Tip: Screens can be used on corner, 120° worksurfaces.

- 24"W screens can be used on worksurfaces with dimensions C and D each equal to 43".

- 24"W and 30"W screens can be used on worksurfaces with dimensions C and D each equal to 49".

Tip: Corner, 120° worksurfaces with dimensions C and D each equal to 37" cannot accommodate screens.

Standard Includes	Required to Specify
-------------------	---------------------

- Worksurface: laminate or wood veneer
- Laminate worksurface: plastic P-edge profile on all sides
- Wood worksurface: wood square 3 mm, wood tapered, or 6000 Black plastic P-edge profile on all sides

- 1 Style number with appropriate edge profile suffix in the space provided
 - P** Laminate with vinyl P-edge
 - V** Wood with vinyl P-edge
 - SW** Wood with square edge
 - BW** Wood with tapered edge
- ▶ See edge profiles below
- 2 Laminate or wood color number for worksurface
- 3 Plastic color number for P-edge on laminate worksurface, if selected
- 4 Options, if selected (see below)
- ▶ See *Surface Materials*, page D102.

Tip: Your specification is not complete until you add a suffix to the style number to define the edge profile (for example, BZC302460__ becomes BZC302460V for wood with vinyl P-edge profile).

Worksurfaces

Rectangle Worksurfaces

Laminate or Wood Veneer

SIN 711.1

Standard Includes	Required to Specify
-------------------	---------------------

- Worksurface: laminate or wood veneer
- Laminate worksurface: plastic P-edge profile on all sides
- Wood worksurface: wood square 3 mm, wood tapered, or 6000 Black plastic P-edge profile on all sides
- Reinforcing brace for worksurfaces wider than 60"W

- 1 Style number with appropriate edge profile suffix in the space provided
 - P** Laminate with vinyl P-edge
 - V** Wood with vinyl P-edge
 - SW** Wood with square edge
 - BW** Wood with tapered edge
- ▶ See edge profiles below
- 2 Laminate or wood color number for worksurface
- 3 Plastic color number for P-edge on laminate worksurface, if selected
- 4 Options, if selected (see below)
- ▶ See *Surface Materials*, page D102.

Tip: Legs to support free-standing worksurfaces must be specified separately.

Tip: For leg and support guidelines, refer to the Leg Matrix.
▶ See *Unison Specification Guide*.

Tip: Tether brackets to attach 36"D x 72"W rectangle worksurfaces to Pathways Post and Beam fence must be specified separately.

Worksurfaces

Split-Round Worksurfaces

Laminate or Wood Veneer

SIN 711.1

Tip: Legs to support free-standing worksurfaces must be specified separately.

Tip: When ordering legs for split-round worksurfaces to be used with Pathways Post and Beam, specify with glides.

Tip: Order split-round work-surface when a fixed position around a Pathways Post and Beam column and hub is desired.

Tip: Order two hub spanners for mobile teaming environments when a permanent connection is not desired.
▶ Page D67

Tip: For leg and support guidelines, refer to the Leg Matrix.
▶ See Unison Specification Guide.

Tip: Split-round worksurfaces are specified as a pair. Bracket kit is included to connect the two worksurfaces.

Tip: Your specification is not complete until you add a suffix to the style number to define the edge profile (for example, BZC302460__ becomes BZC302460V for wood with vinyl P-edge profile).

Standard Includes

- Pair of worksurfaces: laminate or wood veneer
- Laminate worksurfaces: plastic P-edge profile on all sides
- Wood worksurfaces: wood square 3 mm, wood tapered, or 6000 Black plastic P-edge profile on all sides
- Vinyl flat profile on inside edges: plastic default
- Bracket kit to connect worksurfaces

Required to Specify

- 1 Style number with appropriate edge profile suffix in the space provided
 - P** Laminate with vinyl P-edge
 - V** Wood with vinyl P-edge
 - SW** Wood with square edge
 - BW** Wood with tapered edge
- ▶ See edge profiles below
- 2 Laminate or wood color number for worksurface
- 3 Plastic color number for P-edge on laminate worksurface, if selected
- 4 Options, if selected (see below)
- ▶ See *Surface Materials*, page D102.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Paint

Applies to:

- Elliptical leg

4799 Platinum
7207 Black

Applies to:

- Cabby legs
- Post legs
- Double post C-legs
- Crank adjustable height worksurface
- Grommet adapter plates
- Consolidation point cabinet

Tip: For electrically adjustable height worksurfaces, transitional paints only are available.

▶ See *Transitional Products Specification Guide*.

Price Group 1

Textured Paint

7207 Black
7225 Sand (Vanadium)
7236 Fog
7237 Slate
7238 Fieldstone
7239 Midnight

Price Group 2

Metallic Paint

4750 Champagne
4751 Bronze
4752 Steel
4788 Gold Dust
4798 Sterling
4799 Platinum

Price Group 3

Accent Paint

Please see the Accent Paint swatchcard in the *Surface Materials Finishes Binder* for a complete list of these colorful paints.

Tip: Price Group 3 paints are not available on cabby legs.

PerfectMatch II Paint

PerfectMatch II paint is a service that allows you to create your own paint color. Refer to the *Surface Materials Reference Manual* for more information about this program.

Tip: The PerfectMatch II paint program is not available on cabby legs.

Metal

Applies to:

- Cabby legs
- Elliptical leg

9201 Polished Chrome

Laminate

Laminate Color Choices

Applies to:

- Universal Systems work-surfaces—laminate

Standard Laminate

2412 Natural Cherry
2422 Medium Cherry
2511 Winter on Maple
2592 Blonde on Maple
2632 Medium Oak
2714 Natural Walnut
2722 Cream
2729 White Sand
2730 Arctic White
2746 Black
2759 Warm White
2772 Medium Mahogany on Walnut
2810 Dawn
2811 Mist
2820 Coffee Speckle
2822 Woodrose Speckle
2823 Driftwood Speckle
2824 Smoke Speckle
2825 Vanadium Speckle
2850 Vanadium Fiber
2851 Rhyme Fiber
2852 Tungsten Fiber
2854 Vellum Fiber
2857 Stream Fiber
2859 Novell Fiber
2860 Granite Fiber
2870 Blonde Bronze Patina
2871 Blackened Bronze Patina
2872 Silver Plate Patina
2873 Instant Iron Patina

Accent Laminate

Accent laminates are available with an upcharge of \$60 U.S. or \$83 Canadian per worksurface. Please see the *Accent Laminate* swatch card within the *Steelcase Hard Finishes Binder* for a complete listing of these colorful laminates.

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Open Line Laminate

This service allows you to order non-standard laminate at an additional processing fee of \$60 U.S. per worksurface, plus the cost of the laminate.

When processing orders for Open Line Laminate, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Laminae

Applies to:

- Laminae screens

2101 Frost
2102 Bisque
2103 Dove
2104 Charcoal
2105 Fiesta
2106 Berry

Note: Laminae is not a markerboard surface and should not be written on with markers or dry-erase markers.

Vertical Surface Fabric

Applies to:

- Knit screens

B902 Soft White
B903 Fog
B904 Sand

Wood

Applies to:

- Universal Systems work-surfaces—wood veneer

Steelcase carefully selects veneer and solid wood or consistent color and grain structure. Wood is a natural material and variations will occur in color, grain, and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be arranged periodically to ensure even aging of wood surfaces.

Veneers are flat cut and are matched for proper balance and consistency.

Open-pore finish is a medium-gloss finish that leaves the wood texture visible to the eye and distinguishable to the touch.

Open-pore finish choices

- 3412 Natural Cherry
- 3422 Medium Cherry
- 3562 Linseed on Maple
- 3572 Amber Maple on Maple
- 3582 Winter on Maple
- 3592 Blonde on Maple
- 3632 Medium Oak
- 3642 Natural Oak
- 3712 Natural Walnut
- 3722 Dark Mahogany on Walnut
- 3742 Autumn Walnut
- 3772 Medium Mahogany on Walnut
- 3792 Black Walnut

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look and it is smooth to the touch. This finish is available on the wood work surface or top only.

Full-fill finish choices

- 3414 Natural Cherry
- 3424 Medium Cherry
- 3534 Winter on Maple
- 3544 Blonde on Maple
- 3564 Linseed on Maple
- 3574 Amber on Maple
- 3634 Medium Oak
- 3644 Natural Oak
- 3714 Natural Walnut
- 3724 Dark Mahogany on Walnut
- 3744 Autumn Walnut
- 3774 Medium Mahogany on Walnut
- 3794 Black Walnut

Customiz stain

Customiz stain is a service that allows you to create your own stain colors on standard veneers. Customiz stain color is available on all product lines that offer wood veneer.

A one-time formulation fee of \$400 U.S. per color, per customer processing fee will apply. The fee covers the cost of formulating the Customiz finish and applies regardless of whether or not an order for product is placed. Please refer to the "Customiz Stain" option price column in your specification guide for the unit upcharge.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by specials engineering. Customiz stain on custom veneers take two to four weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Plastic

Applies to:

- 3 mm edge profile on Universal Systems laminate worksurfaces

- 6000 Black
- 6001 Coffee
- 6008 Bramble
- 6615 Grey V5
- 6619 Ice
- 6628 Tan V1
- 6631 Cream
- 6635 Dawn
- 6636 Mist
- 6654 Sand (Vanadium)
- 6655 Warm White
- 6694 Slate
- 6695 Midnight
- 6697 Fog
- 6698 Fieldstone

Applies to:

- P-edge profile on Universal Systems and Freestanding laminate worksurfaces

- 6000 Black
- 6654 Sand (Vanadium)
- 6694 Slate
- 6695 Midnight
- 6697 Fog
- 6698 Fieldstone

Note: Light color plastic edges are susceptible to degradation due to normal wear and tear. Staining (e.g. ball point pen) and dirt effects are more pronounced in light colors and are not considered defects.

Applies to:

- P-edge profile on Universal Freestanding wood veneer worksurfaces
- 6000 Black

Applies to:

- Receptacles
- Modular connector
- Modular infeed cover
- Cable entry housing
- Internode convenience communication outlet housing
- Internode beltway power outfeed

- Cable grommet
 - 6000 Black
 - 6625 Translucent
 - 6651 Tungsten
 - 6652 Titanium
 - 6653 Solar Black
 - 6654 Vanadium
 - 6656 Tantalum
 - 6681 Grotto
- Tip: Plastic components may not be available in all colors above.*

Dupont™ Corian

Steelcase – Dupont Corian – TFI Alliance

Steelcase now has an alliance with Dupont to provide Universal Freestanding Worksurfaces—Laminate made with Corian solid surfaces. These elegant tops are produced and sold exclusively by TFI, the industry leader in the development of products and processes with Dupont Corian. This program is available to authorized Steelcase dealers.

Use this specification guide to understand more about Freestanding Worksurfaces; pricing is available from TFI in the Steelcase Corian Binder. To order Corian, simply add "COR" to the suffix of the Freestanding Worksurface style number and fax the order directly to TFI.

Steelcase Corian Colors

Eight Corian colors have been selected which best suit the Steelcase surface materials color palette: Antarctica, Cameo White, Canyon, Linen, Riviera Mist, Shale, Vanilla, and Winter Frost samples can be ordered as a set.

For additional information regarding becoming an authorized dealer or to order literature and samples contact:

TFI
1600 Oak Street
Lakewood, NJ 08701
Phone: 866.834.6054
Fax: 732.363.9129

Color Coordination Matrices

Recommended Front Edge Colors for Universal Systems Worksurfaces—Laminate

Edges

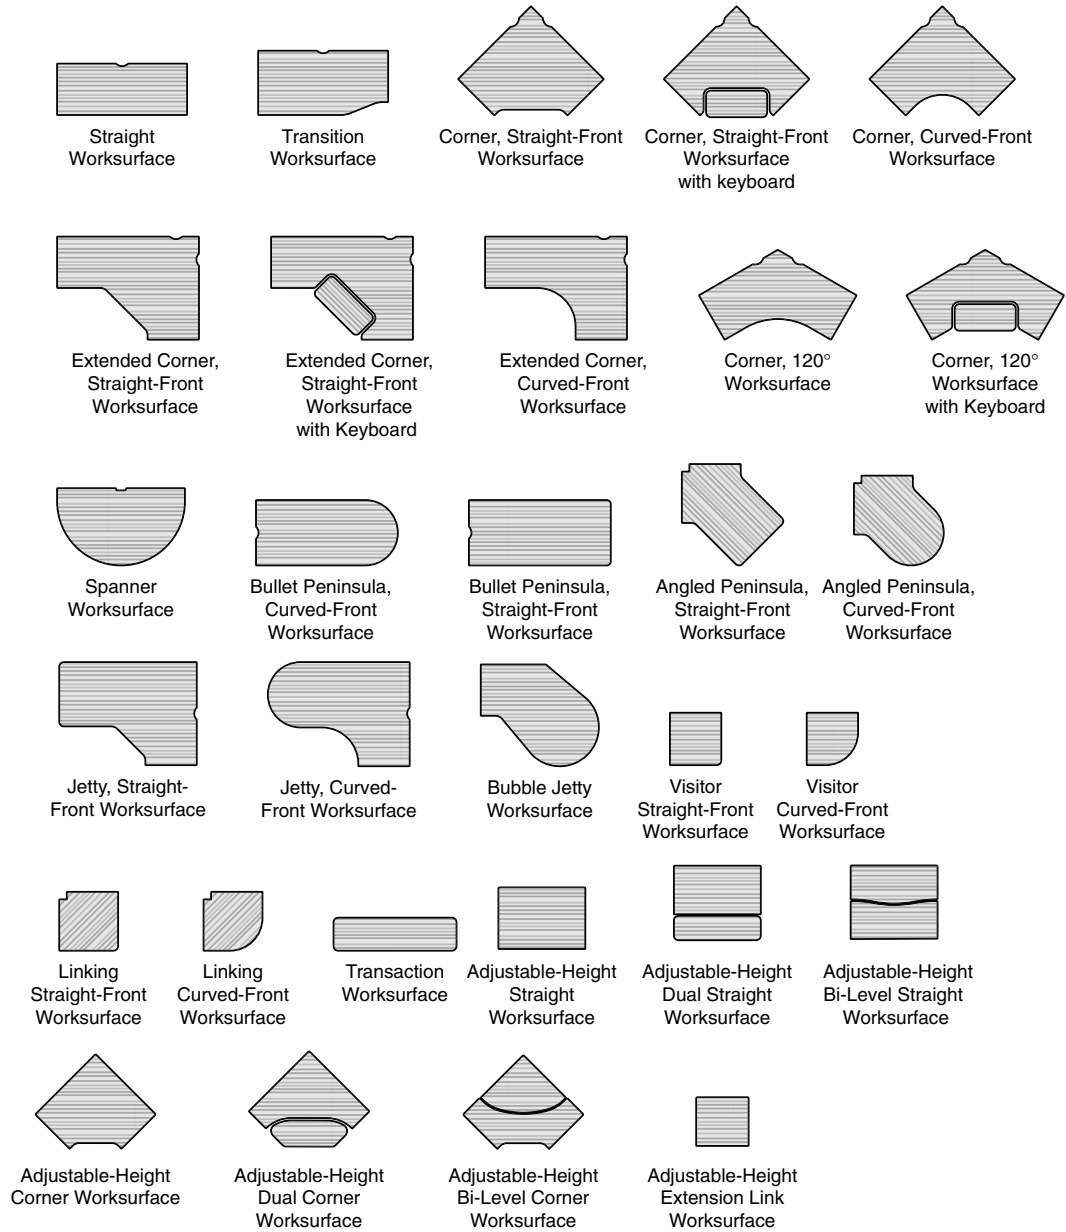

The recommended edge color will compliment the laminate color you specify. Edge color is specified separately.

Laminate Color	Recommended 3 mm Edge Color	Recommended P-Edge Color
2412 Natural Cherry	6001 Coffee	6000 Black
2422 Medium Cherry	6001 Coffee	6000 Black
2511 Winter on Maple	6655 Warm White	6654 Sand

Wood Grain Directions

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.
