

# Harness the **full power** of your digital print operation with FreeFlow<sup>™</sup> Output Manager.

FreeFlow Output Manager Software brings new levels of control, flexibility and productivity to the print production floor. It helps you maximize printer productivity, minimize operator intervention and initiate worry-free “lights-out” production printing.

Designed for publishing and print-on-demand operations with multiple digital printers, Output Manager gives you the power to manage multiple printers from one central location.

- Meet tight turnaround times by effectively prioritizing, scheduling and splitting jobs.
- Maximize production capacity by leveraging existing digital print resources.
- Lower production costs by reducing labor needs and automating job management.
- Receive jobs from anywhere on your network and send them to the right device.

**Output Manager** provides a single point of control for job management and print production systems.

**Input flexibility**  
Accept jobs from:

- Job submission clients
- Internet
- Network PCs
- Mainframes
- Hot folders

**Load balancing**  
Increase throughput by processing jobs across multiple printers.

**Job splitting**  
Split jobs based on color, copy or page to improve productivity.

**Scripting**  
Scripting of job processing functions enables tighter integration and customization of workflow.

**Job attribute matching**  
Examines job attributes and routes job to printer with matching characteristics.

Output Manager supports the digital printer that's right for your job. This workflow software also works with other manufacturers' printers with IPP and LPR support.

From monochrome forms to highlight-color newsletters to full-color catalogs and brochures, FreeFlow Output Manager helps you produce the applications you need on the right digital printing device.

# FreeFlow Output Manager

## Capabilities and Benefits

Output Manager provides key features to optimize the particular scenarios faced by modern-day publishing and on-demand digital print operations, resulting in substantial customer benefits.

Meet tight turnaround times by effectively prioritizing, scheduling and splitting jobs.

- Modify job priority
- Job scheduling for a queue is priority-based
- Operator can set job scheduling for first-in/first-out, by priority or based on time
- Split jobs based on color, copy or page to improve productivity

Maximize production capacity by leveraging existing digital print resources.

- Load balance across multiple printers to increase throughput
- Supports Xerox and other manufacturers' printers via LPR and IPP printing protocols
- Cost-effective printing of monochrome, highlight color and full-color documents
- Formats supported: PostScript, PDF, PCL, TIFF and ASCII
- Output Manager communication enhanced with IPP-enabled Xerox printers
- Interoperability with other FreeFlow products such as Print Manager, Makeready, Process Manager and DocuSP®

Lower production costs by reducing labor needs and automating job management.

- Single point of job management for network production printing
- Job attribute matching examines job attributes and can automatically route job to printer with matching characteristics
- Set pass-through mode for a queue
- Dynamically create a queue associated with all devices or with specific devices
- Workflow automation and integration flexibility can be achieved by adding pre- and post-processing capabilities with scripting

Receive jobs from anywhere on your network and send them to the right device.

- Manage documents printing from multiple clients via network to queues created on the server
- Control over document delivery workflow
- Reprint an entire job or just selected pages
- Redirect a portion of a job to another printer
- Move job from one queue to another

As digital printing operations grow, so does the need for effective output management across multiple devices. Find out how Output Manager can give you the power to manage multiple printers from one central location—reducing labor, optimizing resource utilization and streamlining how jobs get done. Talk to your Xerox representative today.

### Minimum System Requirements:

#### PC Workstations:

- Microsoft Windows Server 2003
- Intel Pentium IV 2.4 GHz processor or greater
- At least 1 GB of RAM
- At least 80 GB of available disk space
- CD-ROM drive
- Internet Explorer version 6.x or higher, or Netscape 7.x or higher

#### SUN Workstations:

- Sun Blade 1500
- 1 GHz UltraSparc IIIi workstation
- Sun Solaris version 9.0 with Gnome 2 desktop installed or later
- At least 1.5 GB RAM
- At least 80 GB of available disk space
- CD-ROM drive
- Internet Explorer version 6.x or higher, or Netscape 7.x or higher, or Mozilla 1.4 or higher
